

Welcome to the OPA Webinar!

Title X Program Guidelines Revision Process

Presented by: Susan Moskosky, MS, RNC
Director, Office of Family Planning

Lorrie Gavin, MPH, PhD
*Senior Scientist, Division of Reproductive Health
Centers for Disease Control and Prevention*

The webinar will begin momentarily- please stand by...

Expert Work Group Meeting

Presentation Overview:

1. Background and purpose of the Title X Program Guidelines
2. Overall goal of Title X Program Guidelines revision
3. Review of the Title X Program Guidelines revision process, progress to date and next steps

Program Guidelines

- DHHS uses Program Guidelines in lieu of or in addition to codified program regulations
- Program Guidelines are the agency's opportunity to tell applicants and recipients what their project should consist of, as well as other relevant information
- Program staff generally develop Program Guidelines to clarify the Program Statute/Regulations and provide information to potential recipients about how to implement the program

Purpose of the Title X Guidelines

- To assist ***current and prospective grantees*** in understanding and utilizing the family planning service grants program:
 - **Grant application and award process**
 - **Project management & administration**
 - **Financial management**
 - **Clinic management and clinical service requirements**
- Although primary target audience of the guidelines is Title X grantees, these guidelines can and do serve as a “standard of care” for other stakeholders

Brief Background

- Original guidelines established in 1970 following the enactment of Public Health Service Act 42 U.S.C. 300 authorizing the establishment of the Title X program
- Current guidelines were updated in 1980 and in 2001
- Address largely legal and regulatory requirements of Title X program

Why Revise the Title X Guidelines?

OPA's perspective on the limitations of existing guidelines:

- Guidance on clinical practices do not meet current nationally recognized standards of care and in some instances are too prescriptive or restrictive
- Guidelines do not incorporate evidence-based standards of care and best practices
- Do not allow for timely updates and revisions based on medical, technological, and other advancements

Why Revise the Title X Guidelines?

OPA's perspective on the limitations of existing guidelines:

- Current structure organizes all content--legal, administrative, and clinical expectations into one comprehensive document
- Updating or augmenting content relating to clinical expectations requires review of the entire document including content relating to the law, statute, and administrative requirements
- Updating/revision is slow due to the fact that all content (even that which has not changed) must be reviewed

“Ideal” Guidelines

- Should address current Title X priorities
- Should provide clear guidance on administrative, financial and clinical program requirements without being too prescriptive or restrictive
- Should be consistent with national standards of care
- Should be current and reflect strong evidence base and best practices
- Should lend themselves to update/revision in a timely manner

Overall Goal of Revision Process

Goal of the revision process: to update the Title X Program Guidelines and make them more responsive to emerging issues

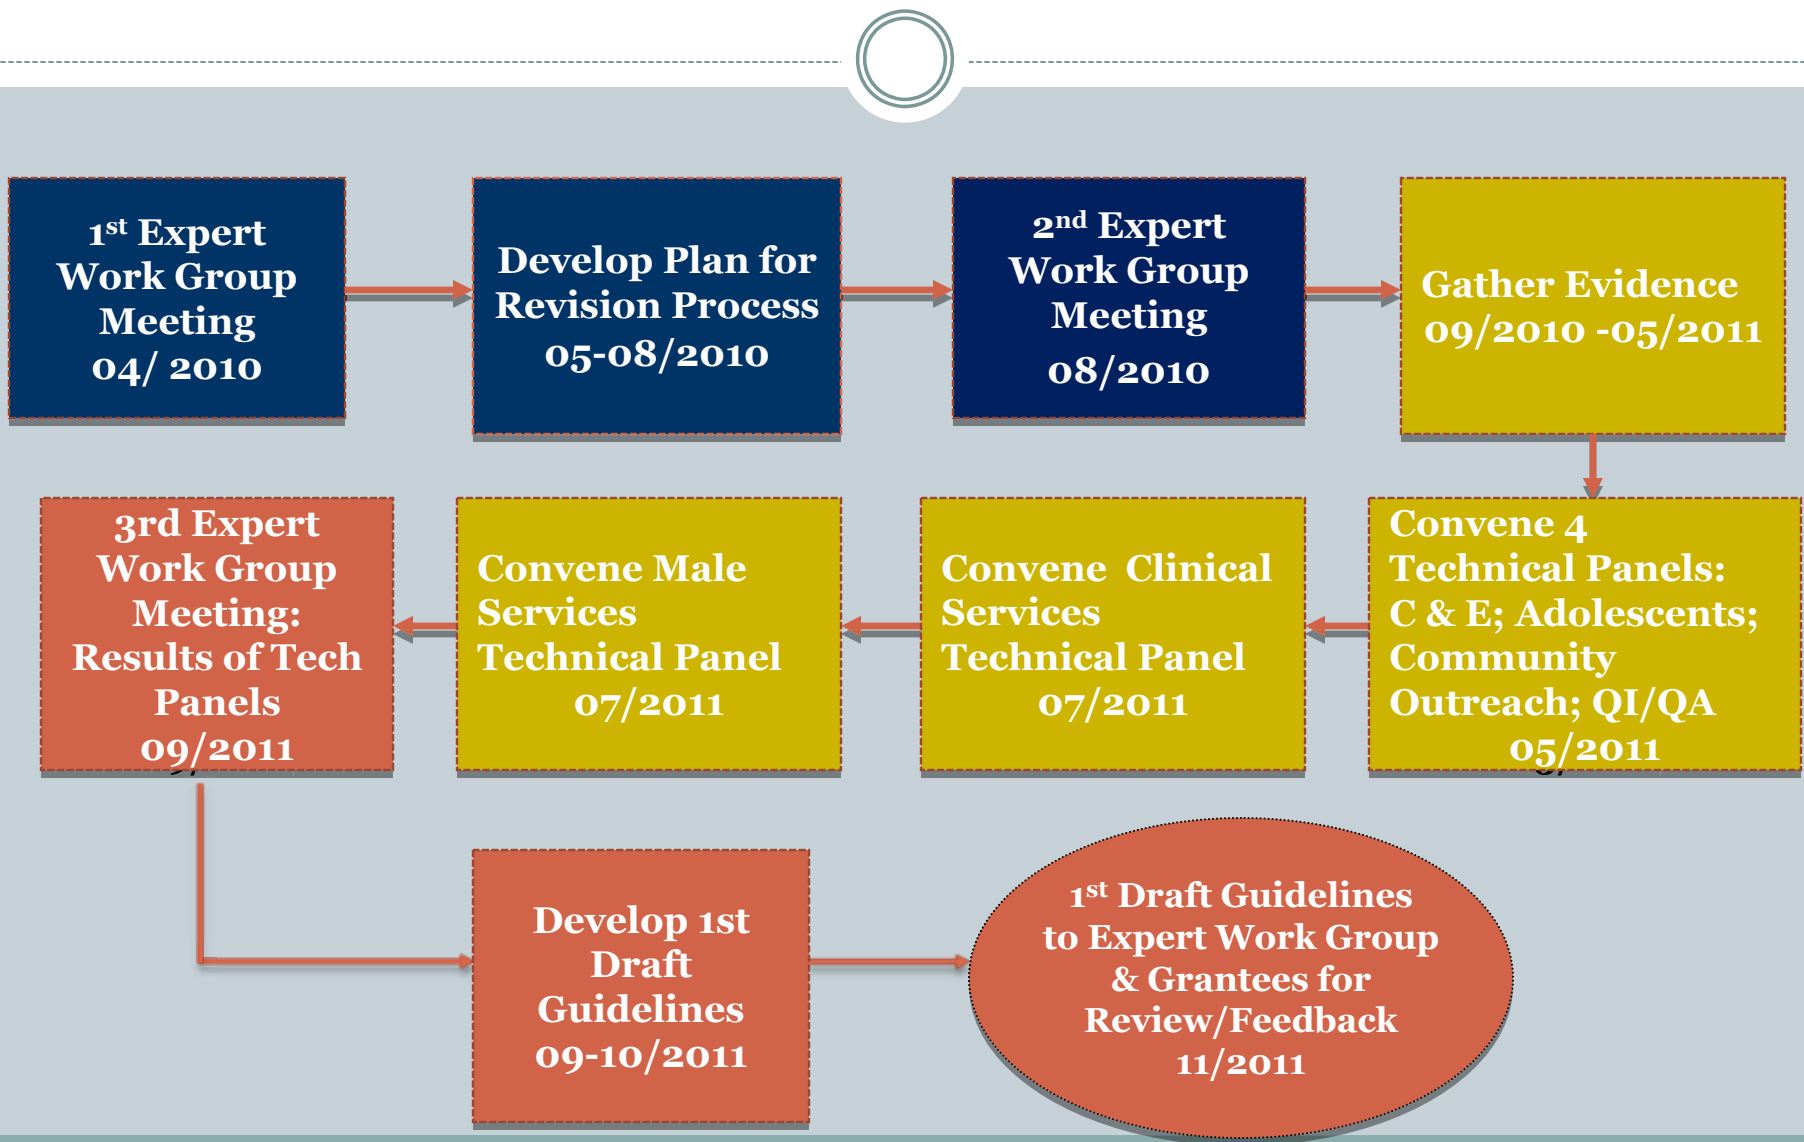

Objective 1: identify a structure for the guidelines that:

- **advises grantees about administrative, management and clinical expectations and requirements**
- **incorporates the most current national standards of care and evidence-based and best practices**

Objective 2: identify content areas/domains that guidelines should encompass

Objective 3: establish a process through which guidelines can be regularly maintained and updated

Guidance Revision Process: Phase 1

Guidance Revision Process: Phase 2

Expert Work Group Members

**1st Expert
Work Group
Meeting
04/ 2010**

**Develop Plan for
Revision Process
05-08/2010**

**2nd Expert
Work Group
Meeting
08/2010**

- IOM
- CMS
- ACOG
- PPFA
- HRSA
- ARHP
- CHC

- FP RTC
- FP MTC
- FP CTC
- NFPRHA
- SFPA
- FPCA

Expert Work Group Meeting Objectives

- Explore possible paradigms and structures for the Title X Guidelines (Expert WG Meeting #1)

Expert
Workgroup
consultation

- Explore requirements and domains of content that should be addressed by the Title X Guidelines (Expert WG Meeting #2)
- Explore processes for ensuring that the guidelines are updated in a timely manner and reflect current standards of care and best practices

Work Group Meeting #1: April 15-16, 2010

Explore possible paradigms and structures for the Title X Guidelines

Questions the Work Group Addressed:

- What are the strengths and weaknesses of the current Title X Guidelines structure?
- What are advantages or disadvantages of other possible structures or paradigms?
- What paradigm would be most useful or effective for Title X grantees?

Between the Expert Work Group Meetings: April-August 2010

OPA and CDC:

- Identified key steps and detailed the Guidelines revisions process/timeline
- CDC reviewed relevant literature (IOM; Bruce 1990; Becker 2007)
- OPA identified the “Must” requirements in the current Title X Guidelines that are substantiated by Statute or Regulations, as well as those that are not
- CDC drafted a possible “Organizing Framework” for portions of the Program Guidelines
- OPA and CDC mapped the Title X “Must” requirements and “Should” recommendations to the organizing framework as a usability test

Work Group Meeting #2: August 30-31, 2010

Explore requirements and domains of content that should be addressed by the Title X Guidelines

Questions the Work Group Addressed:

- Are the requirements and domains in the current guidelines appropriate for the intended use?
- What criteria should be used in the selection of domains?
- What other areas should be included? What is missing?
- What terminology for the Guidelines should be used?

Major Meeting Outcomes

Expert Work Group provided feedback on :

1. Possible structure/paradigm for the Program Guidelines
2. Those requirements/domains that are important/essential for quality family planning services (e.g., must be included in Title X Guidelines) and should be included in evidence search
3. Those requirements/domains that may be important to include in Title X Guidelines, but need evidence-based guidance or other justification that validates/supports why it should be included or how to perform effectively

DRAFT Title X Program Requirements and Program Guidance Sections

Derived from:
Title X Statute
Title X Regulations
Grants Policy
Statement & Others

Program Requirements

Introduction

Title X Statute, Regulations
and Legislative Mandates

Applicable Federal Law
and Regulations

Project Administration &
Management

Required Services

Informed by:
CDC; ACOG;
ACS; USPSTF &
Others

Program Guidance

Introduction

Title X Clinical
Requirements

Quality Clinical Services

Effective Service Delivery
Infrastructure

DRAFT Title X Program Requirements Section: Under Construction

DRAFT Program Requirements Section

Derived from:
Title X Statute
Title X Regulations
Grants Policy
Statement & Others

Program Requirements

Introduction

Title X Statute, Regulations
and Legislative Mandates

Applicable Federal Law and
Regulations

Project Administration &
Management

Required Services

DRAFT Program Requirements Section

Program Requirements Section will:

- Generally interpret the Title X Statute and Regulations in operational terms
- Provide a general orientation to the Federal perspective on family planning
- Provide guidance on other Federal and grants management requirements
- Succinctly present Program Requirements, according to law and regulation

DRAFT Program Requirements Section

This section will be derived from:

- Title X Statute
- Legislative Mandates
- Title X Regulations
- Federal Administrative Regulations
- OMB Circulars
- Grants Management Policy
- OPA Program Instructions

DRAFT Title X Program Guidance Section: Under Construction

DRAFT Program Guidance Section

Program Guidance

Introduction

TitleX Clinical Requirements

Quality Clinical Services

Effective Service Delivery
Infrastructure

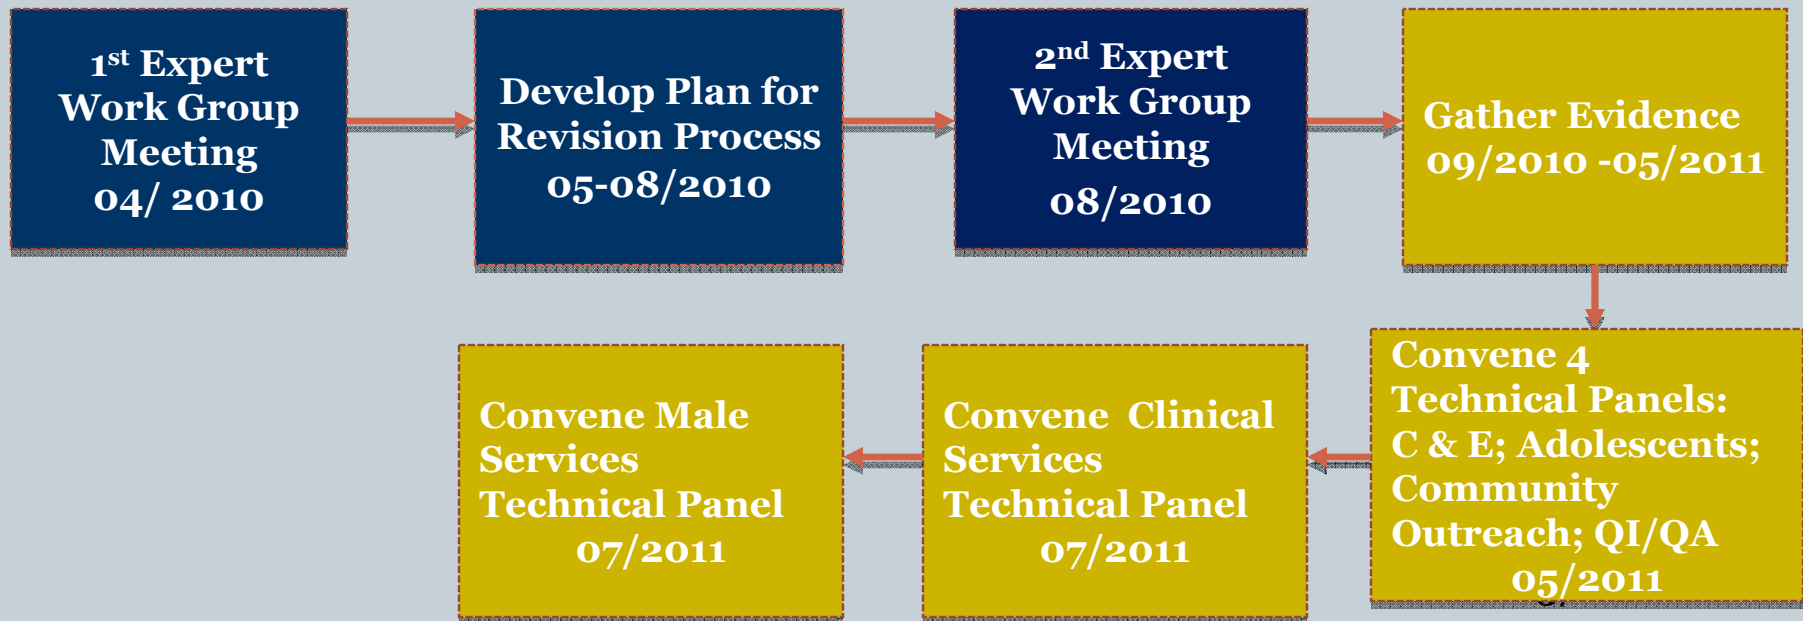

Informed by:
CDC; ACOG;
ACS; USPSTF &
Others

Domains for Evidence Search

- Community Outreach, Participation and Barriers to Access
- Contraceptive Counseling and Education
- Adolescent Services
- Quality Assurance/Quality Improvement
- Clinical services for female clients
- Clinical services for male clients

Guidance Revision Process: Current Efforts

Gathering the Evidence

- Systematic reviews of the scientific literature
- Documentation of “innovative practices”
- Synthesis of professional recommendations on clinical aspects of care

Systematic Reviews: Key Steps

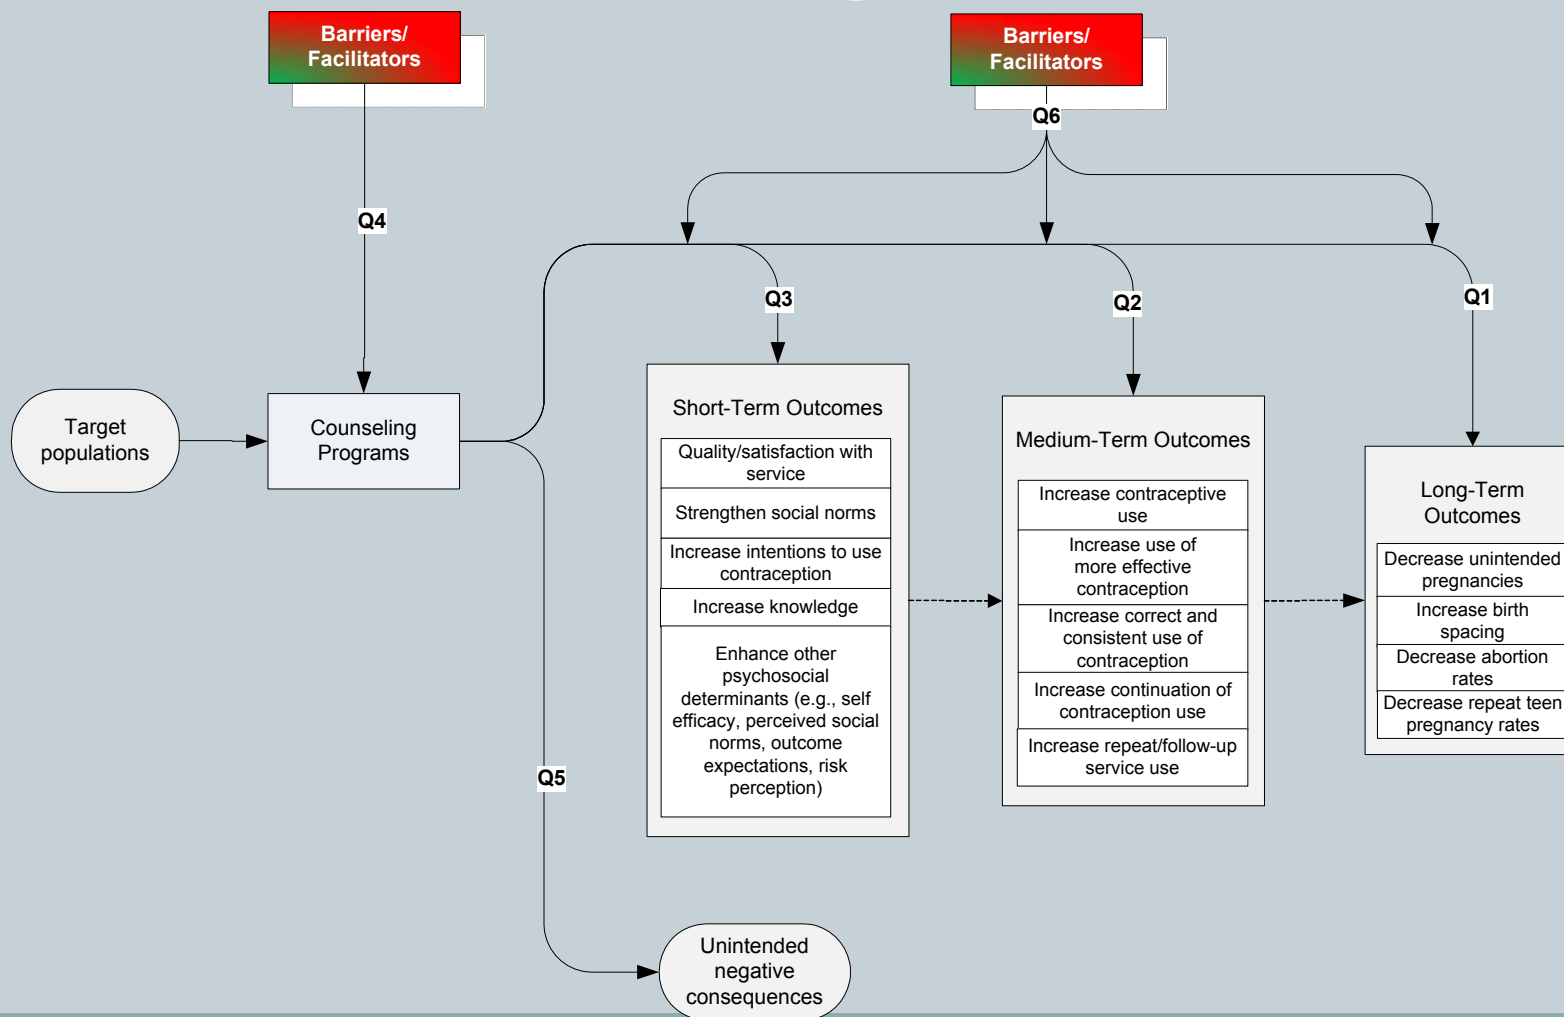

- Define terms
- Develop key questions
- Develop search terms/strategy
 - Key terms to capture appropriate literature
 - Define inclusion & exclusion criteria
- Search in multiple electronic databases
- Screen abstracts to identify those that meet retrieval criteria
- Review full papers – apply inclusion criteria
- Grade the ‘quality’ of identified studies
- Summarize the evidence base

Key Questions for Counseling & Education

Key Question #	Question
1	Is there a relationship between counseling programs and improved long-term outcomes of family planning services (e.g., decrease unintended pregnancies, increase birth spacing, decrease abortion rates, decrease repeat teen pregnancy rates)?
2	Is there a relationship between counseling programs and improved medium-term outcomes of family planning services (e.g., increase contraceptive use, increase use of more effective contraception, increase correct and consistent use of contraception, increase continuation of contraception use, increase repeat/follow-up service use)?
3	Is there a relationship between counseling programs and improved short-term outcomes of family planning services (e.g., improve quality/satisfaction with service, strengthen social norms, intentions to use contraception, increase knowledge, enhance other psychosocial determinants)?
4	What are the barriers and facilitators facing clinics to adopting and implementing counseling programs in the family planning setting?
5	Are there any unintended negative consequences associated with counseling programs when used in the family planning setting?
6	What are the barriers and facilitators facing clients to adopting positive outcomes after receiving counseling in the family planning setting?

Analytic Framework for COUNSELING & EDUCATION

6	Combine all sets (excluding Adolescent set)	(#1 OR #2) AND (#3 OR #4)	7732
7	Combined all sets with adolescents	#6 AND #5	3182
8	Limit	#6 AND (only items with abstracts, Publication Date from 1985/01/01 to 2010/12/03; not Editorial, Letter, Comment, News, Newspaper Article)	4440 Endnote
9	Limit	#7 AND (only items with abstracts, Publication Date from 1985/01/01 to 2010/12/03; not Editorial, Letter, Comment, News, Newspaper Article)	2077

Retrieval Criteria

- Published between 1985 - present
- Published in the English language
- Article must describe a study that speaks to at least one of the six key questions addressed by this evidence report
- Article must describe a study that occurred in a clinic-based setting where family planning services were provided
- If the same study is reported in multiple publications, the most complete publication will be the long-term reference. Data will be extracted to avoid double-counting individuals

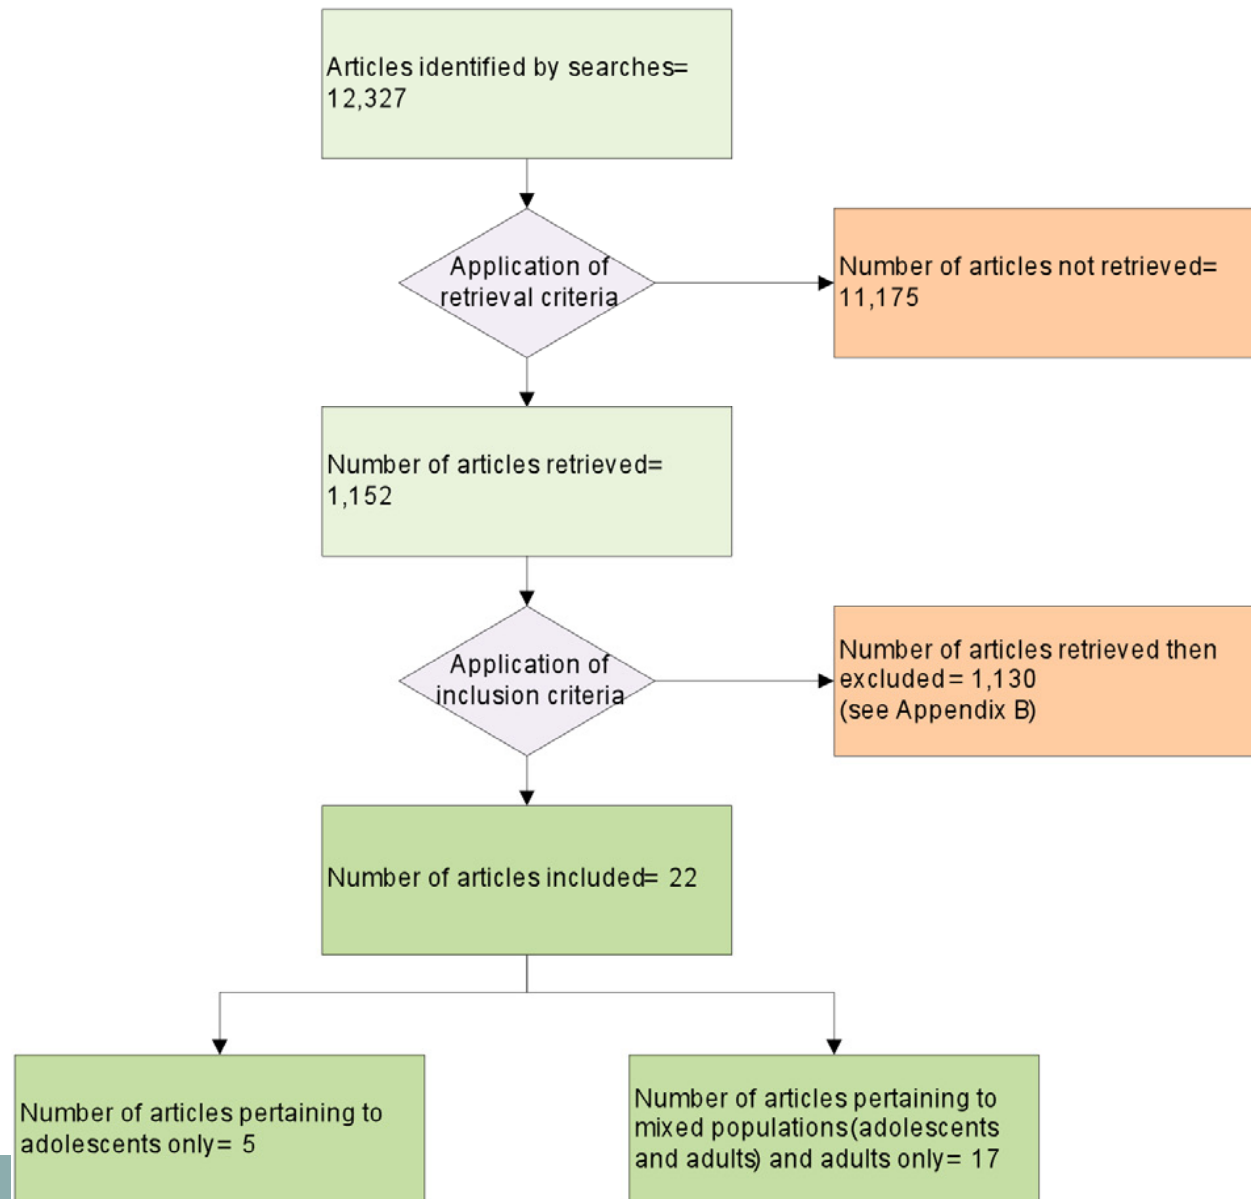

Inclusion Criteria

Key Questions 1 through 3

- Case reports/program descriptions will not be included
- Article must describe a study that attempted to determine if counseling programs in family planning services impact at least one long-term, medium-term, or short-term outcome
- Article must describe a study that includes a comparison e.g., experimental or quasi-experimental design, pre-post test design, case control, or comparing two or more groups in a cross-sectional survey

Flow Diagram Showing Evolution of Databases

Innovative Practices

- Practices that:
 - Addressed priority areas (counseling, community outreach, adolescents, QA/QI)
 - Were developed by practitioners in the field
 - Have some evidence of success
 - Could be replicated (e.g., manuals or procedures documented)
- Requested nominations, then every nomination was fully described
- 44 innovative practices were identified:
 - 17 – adolescents
 - 7 – counseling
 - 13 – community outreach and participation
 - 7 – quality assurance/quality improvement

Professional Recommendations on Clinical Care

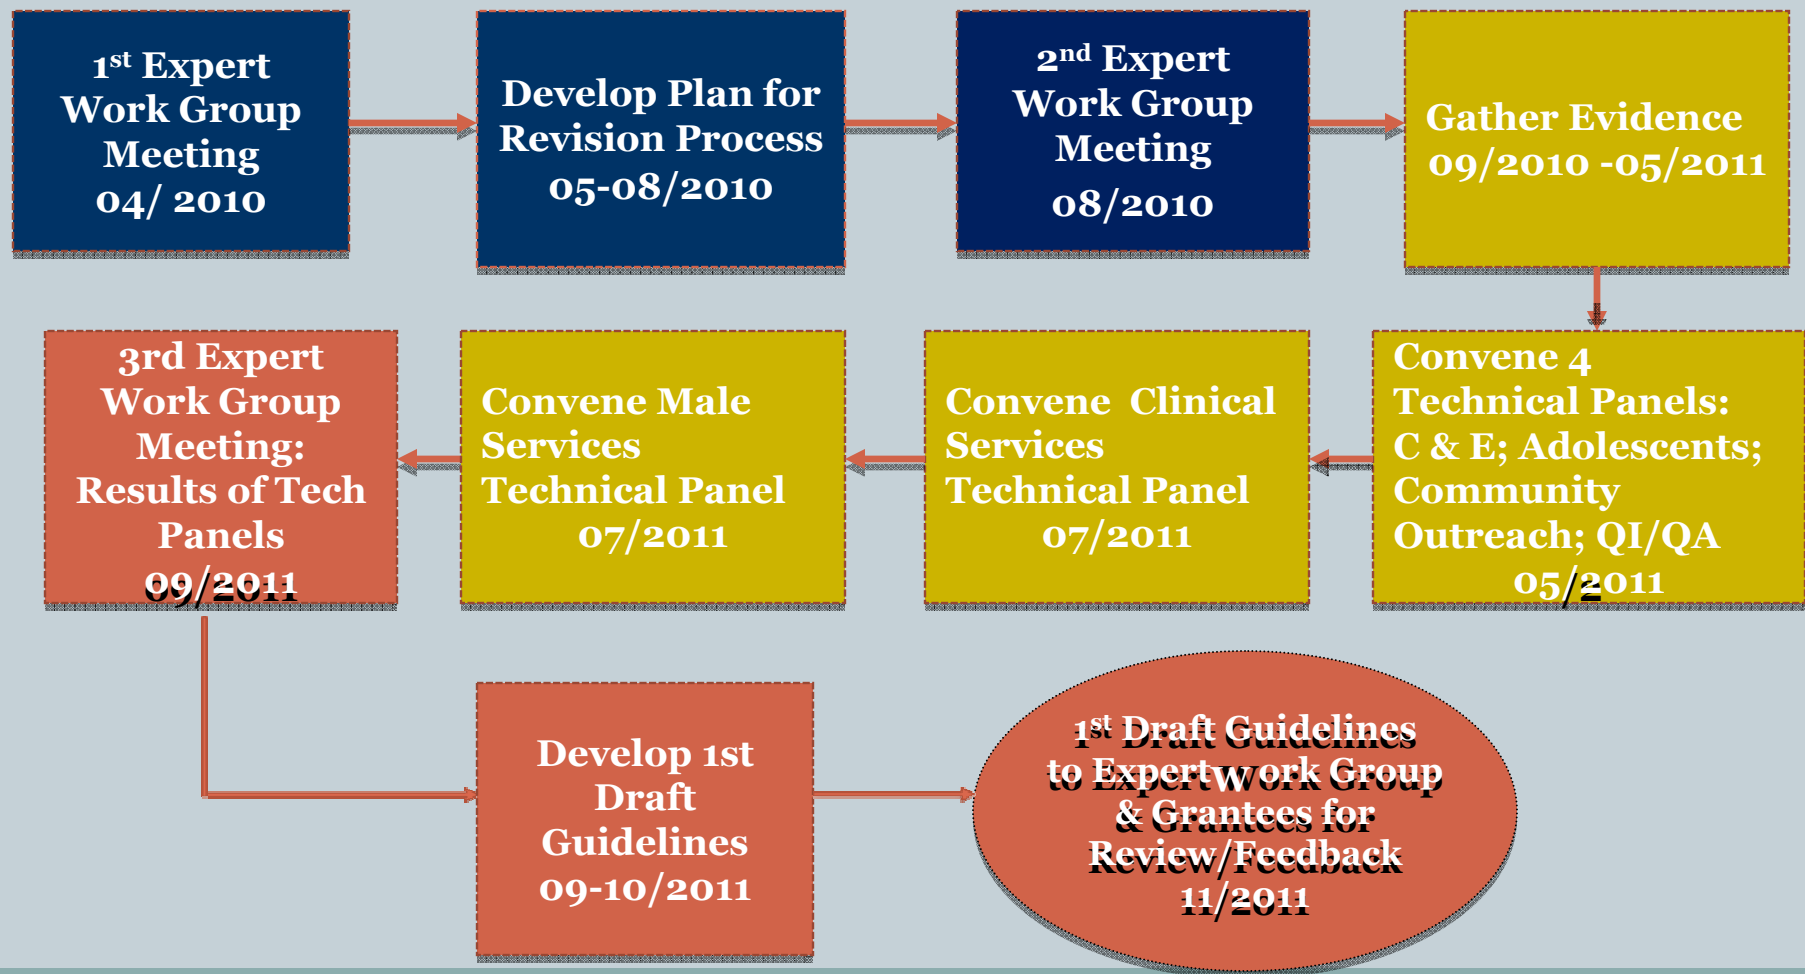

- Compile information from existing professional organizations (e.g., CDC's Division of STD Prevention, CDC's Breast & Cervical Cancer Program, ACOG, AMA, AAP, etc.)
- Consider women's and men's health
- Answer 3-4 key questions about key screening/treatment tasks:
 - What are the recommendations?
 - Are there any inconsistencies?
 - What makes most sense in the context of a Title X clinic?

The Role of the Technical Panels

- Six Technical Panels will be convened:
 - Counseling & Education – May 2011
 - Community Outreach – May 2011
 - Adolescents – May 2011
 - QA/QI – May 2011
 - Clinical services (women and men) – July 2011
- Members selected for their expertise in the content area
- Their job is to:
 - Consider potential implications for program guidelines
 - Consider future research priorities

Guidance Revision Process: Next Steps

Guidance Revision Process: Phase 2

Grantee Feedback

- OPA welcomes all grantee comments/feedback on the Guidelines drafts
- Grantees have two opportunities for commenting and providing feedback on the draft Guidelines
 - ❑ November 2011
 - ❑ March 2012
- OPA is developing a Guidelines website for submission and management of grantee comments/feedback

Title X Program Guidelines

Summary:

- This Guidelines revision process is unlike previous updates/revisions
- The end goals:
 - To produce evidence-based or evidence-informed Title X Program Guidelines that also provide a service/contribution to the greater reproductive health community
 - To create a process/mechanism for keeping the Guidelines current (similar to the MEC approach)
 - To use the review of evidence, and the gaps identified, to inform OPA's future research efforts
