This report was developed by the North Carolina Health Professions Data System, Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill. Funding for the publication of this document was provided by the North Carolina Area Health Education Centers (NC AHEC) Program, UNC-CH School of Medicine, and the Office of the Provost (Health Affairs), University of North Carolina at Chapel Hill.

Introduction

This is the thirty-third annual report prepared from data collected by the North Carolina Health Professions Data System (HPDS). The HPDS was developed to collect and disseminate timely and reliable data on licensed health professionals in North Carolina. Initiated in 1975 with federal funding from the National Center for Health Statistics, the HPDS was assisted in the early 1980s by a grant from the Duke Endowment through the North Carolina Hospital Association. Although selected data are available beginning in 1976, continuous and equivalent data files have been maintained since 1979. For most professions these data include name, business address, birth year, gender, race, information on basic professional education, practice specialty, activity status, form of employment, and practice setting. Special analyses and reports from all data files may be requested (*see Appendix III*).

This report draws on data from the North Carolina HPDS and describes the supply and distribution in 2010 of licensed individuals in nineteen health professions by county and selected regions. The HPDS is maintained by the Cecil G. Sheps Center for Health Services Research of the University of North Carolina at Chapel Hill. Support for the HPDS is provided by the North Carolina Area Health Education Centers (NC AHEC) Program and the University of North Carolina Office of the Provost (Health Affairs). This report would not be possible without the cooperation of the independent health professions licensing boards that provide data to the HPDS.

Sources and Limitations of the Data

Source of Health Professions Data

Health professions data for this report are provided annually by the licensing boards for each of the following professions: certified nurse midwives, chiropractors, dental hygienists, dentists, licensed practical nurses, nurse practitioners, occupational therapists, occupational therapy assistants, optometrists, pharmacists, physical therapists, physical therapist assistants, physicians, physician assistants, podiatrists, practicing psychologists, psychological associates, registered nurses and respiratory therapists. The boards provide demographic, practice, and location information on every professional licensed to practice in the state of North Carolina. This year, and for the past thirty-two years, this annual report has been prepared using data current to October for each year; this makes it possible for users to perform longitudinal analyses and to examine yearly changes in health professionals over time.

Physician data are derived from the NC Medical Board's licensure files. These data contain physicians who are currently in postgraduate medical training programs but who have permanent licenses. In an effort to accurately separate physicians in residency training from those who are not in residency training, listings of physicians in postgraduate medical education programs as of July 2010 were obtained from all North Carolina residency program institutions. These lists were compared with the NC Medical Board's licensing file. Physicians in residency training were not included in the number of counts by county in this publication. All resident physicians enrolled in postgraduate medical education programs were identified and are reported in Table 1. This table excludes some fellowships.

Table 1: Number of Residents-In-Training by Sponsor Location, 2010

Residency Program	County	Residents	Percent
University of North Carolina at Chapel Hill – UNC Hospitals	Orange	714	26.6
Duke University Medical Center	Durham	709	26.4
Wake Forest Baptist Medical Center	Forsyth	506	18.9
East Carolina University – Pitt County Memorial Hospital	Pitt	294	11.0
Charlotte AHEC – Carolinas Medical Center	Mecklenburg	254	9.5
South East AHEC – New Hanover Regional Medical Center ¹	New Hanover	62	2.3
Mountain AHEC – Mission Hospital	Buncombe	51	1.9
Greensboro AHEC – Moses H. Cone Memorial Hospital	Guilford	47	1.8
Carolinas Medical Center – Northeast ²	Cabarrus	24	0.9
Southern Regional AHEC – Fayetteville	Cumberland	20	0.7
State Totals		2,681	100

Source: Residency data are received annually from the respective residency programs and are based on the institutions' lists of house staff, residents and fellows as of July 2010.

¹ Formerly Coastal AHEC

² Formerly Cabarrus Memorial Hospital.

Beginning in 2008, data on nurse practitioners (NPs) were acquired from the NC Board of Nursing; nurse practitioner data in prior publications (1979-2007) were obtained through the NC Medical Board. The NC Midwifery Joint Committee provided data on certified nurse midwives (CNMs). Data for physician assistants (PAs) were obtained from the NC Medical Board. Certified nurse midwives and nurse practitioners are included in the registered nurse (RN) counts.

Definitions and Limitations

Because state law requires a license to practice for each of the professions, the data reported here reflect an accurate enumeration of the supply and distribution of licensed practitioners. However, because the actual activity status of a given professional may change over time (i.e. the person may retire, move out of the state but maintain a license, or maintain a license while working in another profession), having a license does not always indicate that the individual is actively practicing. To adjust for this, the data presented in this report include only those individuals who indicated on their license registration renewal form that they were working in North Carolina and were actively engaged in the profession. Active status practitioners may include administrators, researchers and educators who are active in the profession but not engaged in direct patient care. Active status is assigned to individuals who are newly licensed and have not reported their status. Those with unknown activity status often include newly licensed professionals who at the time of licensure had not yet secured employment in their profession. Individuals who report a business address or hours but who do not report their status are also assigned an active status.³ Health care professionals are assigned to their self-designated primary practice location county if they are active, and to their mailing address county if they are active and their primary practice location is unknown. For physicians, this is based on ZIP code information; for all other professions, counties are identified by the professional on their licensure form. The nursing professions (registered nurses, certified nurse midwives, nurse practitioners, and licensed practical nurses) and the dental professions (dentists and dental hygienists) are grouped together in the region and county pages. Physicians are broken down separately. The remaining professions are listed in alphabetical order.

For the purpose of this report, doctors of medicine (MDs) and doctors of osteopathy (DOs), both of whom register with the NC Medical Board, are grouped together. Physicians are classified by specialty according to the self-reported primary specialty indicated on their initial or renewal application with the NC Medical Board. Physicians whose primary and/or secondary specialty has changed since 2009 were checked against specialty data provided by the NC Medical Society. Physician data in this report are classified by residency-training status in 2010 and federal or non-federal employment status. The physician data reported in this publication are for non-resident licensed physicians who are not currently participating in one of the postgraduate medical education programs listed in Table 1.

³ For physical therapists, physical therapist assistants, occupational therapists and occupational therapy assistants, individuals who report that they are not actively employed in physical therapy or occupational therapy but are seeking employment in physical or occupational therapy are also considered active. These are the only professions that have data available on whether individuals are seeking employment.

Within the category of non-resident physicians are federal and non-federal physicians. Physicians included in the federal category have reported that their principal employer is the federal government. These individuals may have primary practice settings in a health facility in a military installation, Department of Veterans Affairs, U.S. Public Health Service, Indian Health Service, or other federal health facility. Because their practices are in community settings, all National Health Service Corps physicians are included in the non-federal category, except for uniformed Public Health Service physicians who may be in a Health Service Corps placement. The NC Medical Board supplied the federal physician data reported in this document. Federal physicians practicing in government facilities are not required to be licensed by the NC Medical Board to practice medicine in North Carolina, so the numbers for federal physicians reported in this publication may fall short of the actual numbers of federal physicians in the state.

Beginning in 2003, physicians indicating non-federal status were checked against their primary practice setting. Physicians who indicated non-federal status but whose primary practice address was in a military setting were reclassified as federal physicians. Federal providers are not asked to specify their employment setting on the annual registration renewal form; therefore, military providers cannot be subcategorized within the federal providers' category.

The NC Board of Nursing requires biennial registration (in the birth month) for the state's registered nurses (RNs) and licensed practical nurses (LPNs) with half of the state's RNs and LPNs registering with the Board each year. Therefore, the report includes data on the 50% of RNs and LPNs who renewed their registration in 2010, and data for the remaining 50% who renewed their registration in their birth month of the previous year. Additionally, the NC Psychology Board requires biennial registration. Both the Board of Nursing and the Psychology Board update their data in non-renewal years to reflect address changes, new licensees and deceased practitioners.

Population Data

The 2010 projected population data reported in this publication were downloaded from the North Carolina Office of State Budget and Management. The 2010 county and state level population data are projected numbers as the 2010 estimates were not available at the time of publication. In addition, population data by age and gender projections were not yet available for 2010, and 2009 data will be used this year for the county, region and state level pages. The 2009 population figures are based on the April 1, 2000 Census. Ratios of health professionals reported are per 10,000 population, and 2010 population projections were used to calculate ratios per 10,000 population.

Demographic and Economic Data

This publication includes additional health, vital statistics and socio-demographic data. A list of the variable names, numbers, definitions, and the source of data by variable number can be found in *Appendix II: Definition of Terms*. All data provided in this publication are also available online at <http://www.shepscenter.unc.edu/hp/>. The infant mortality rates reported in the 2010 State Totals, Non-Metropolitan/Metropolitan counties, Area Health Education Centers, Health Service Areas, the Department of Environment, Health and Natural Resources, and the Perinatal Care regions are computed as a one year rate.

This publication reports the number of general hospital discharges in 2009 from acute care, short-stay hospitals by county of patient residence. The data exclude normal newborn discharges (DRG 391).

Summary of Trends in North Carolina Health Professional Supply

The overall number of health professionals in North Carolina grew from November 2009 to October 2010. Table 2 summarizes the number of health professionals licensed in the past two years and the percent change in those numbers between 2009 and 2010.

Table 2: North Carolina Health Professions Statistics, 2009 and 2010

	Active in Profession (October) ⁴		
	2009	2010	Percent Change
Physicians			
<i>Non-federal, not in training</i>	19,901	20,752	4.3%
<i>Primary Care Specialties</i>	8,598	9,017	4.9%
Family Practice	2,749	2,802	1.9%
General Practice	101	97	-4.0%
Internal Medicine	3,081	3,314	7.6%
Obstetrics/Gynecology	1,033	1,069	3.5%
Pediatrics	1,634	1,735	6.2%
<i>Other Specialties</i>	11,303	11,735	3.8%
<i>Federal⁵</i>	713	800	12.2%
<i>Residency Training</i>	2,629	2,681	2.0%
Nurses			
Registered Nurses	90,930	93,133	2.4%
Certified Nurse Midwives	237	235	-0.8%
Nurse Practitioners	3,414	3,679	7.8%
Licensed Practical Nurses	18,019	17,941	-0.4%
Other Health Professionals			
Chiropractors ⁶	1,327	1,556	17.3%
Occupational Therapists	2,446	2,545	4.0%
Occupational Therapy Assistants	1,091	1,155	5.9%
Optometrists	1,002	1,025	2.3%
Pharmacists	8,694	8,755	0.7%
Physical Therapists	4,848	5,049	4.1%
Physical Therapist Assistants	2,234	2,319	3.8%
Physician Assistants	3,451	3,652	5.8%
Podiatrists	263	271	3.0%
Practicing Psychologists	1,917	1,978	3.2%
Psychological Associates	934	906	-3.0%
Respiratory Therapists	3,970	4,056	2.2%
Dentists and Dental Hygienists			
Dentists	4,093	4,178	2.1%
Dental Hygienists	5,143	5,278	2.6%

⁴ Data are for in-state professionals; includes unknown activity status.

⁵ Includes federal physicians in the armed services, U.S. Public Health Service, Indian Health Service and the Department of Veterans Affairs. Federal physicians practicing in government facilities are not required to be licensed in the state and therefore these data may underestimate actual supply.

⁶ Missing variable information for the past few years created the inability to determine activity status of many new to file chiropractors. This missing information was received in 2010 and these individuals are now included in the active file, resulting in what appears to be large increase in practitioners between 2009 and 2010.

The majority of health profession groups saw small to moderate growth in 2010. The number of primary care physicians increased 4.9% (+419) from 2009 to 2010, with internal medicine showing the largest growth (+223, 7.6%). Pediatricians (+101) also showed a large increase between 2009 and 2010, experiencing a growth rate of 6.2%. Obstetricians-gynecologists had a moderate percentage increase (+36, 3.5%) and family physicians also grew slightly (+53, 1.9%). The largest percentage increases in other health professions were seen by nurse practitioners (+265, 7.8%), occupational therapy assistants (+64, 5.9%), and physician assistants (+201, 5.8%). In 2010 there were moderate increases in the supply of physical therapists (+201, 4.1%), occupational therapists (+99, 4.0%), physical therapist assistants (+85, 3.8%), psychologists (+61, 3.2%), podiatrists (+8, 3.0%), dental hygienists (+135, 2.6%), registered nurses (+2,203, 2.4%), optometrists (+23, 2.3%), respiratory therapists (+86, 2.2%), and dentists (+85, 2.1%), and small increases in the number of pharmacists (+61, 0.7%). Between 2009 and 2010, both licensed practical nurses (-78, -0.4%) and certified nurse midwives (-2, -0.8%) experienced a small percent decrease in supply, while psychological associates experienced a moderate decrease (-28, -3.0%) in practitioners. The number of chiropractors showed the largest percentage increase (+229, 17.3%). However, this increase can be attributed to receiving and including previously missing variable information concerning the activity status of a large number of chiropractors, rather than a true increase in the number of new chiropractors in the state.

CHANGES IN SUPPLY

Physicians

The 4.3% (+851) growth of **physicians** licensed by the NC Medical Board between 2009 and 2010 was the largest yearly increase over the past ten years. In 2010, all but one county in North Carolina (Tyrrell) had at least one physician reporting a primary practice location in that county. Camden (1), Gates (1), Hyde (1), and Warren (2) Counties had the fewest number of physicians. Fifty-eight counties experienced an increase in the number of physicians, seventeen had no change in supply, and twenty-five counties lost physicians. Counties with the largest percentage growth in the supply of physicians between 2009 and 2010 included Hyde (+1, 100%), Perquimans (+1, 50%), Caswell (+4, 36.4%), and Davie (+7, 31.8%). The largest numeric growth was observed in Durham (+243, 14.1%) and Forsyth (+118, 8.1%) Counties. The largest reduction in numbers was in Jones County (-9, -34.6%), followed by Mitchell (-4, -14.3%) and Mecklenburg (-4, -0.2%) Counties.

Figure 1 depicts the annual growth rate of active licensed **primary care physicians**⁷ practicing in North Carolina over the past ten years. The supply of primary care physicians (PCPs) in North Carolina increased (+419, 4.9%) between 2009 and 2010; the highest rate of annual growth experienced over the past ten years. This increase in supply was slightly greater than the increase in the total physician supply (4.3%) in 2010. This year, the growth rate is greater than the increase in primary care physicians seen in

⁷ Primary care physicians are those who report their primary specialty as family practice, general practice, internal medicine, pediatrics or obstetrics/gynecology.

2009 (3.0%), making this the third consistent year of growth for primary care physicians. Forty-nine counties increased their numbers of primary care physicians, with Hyde (+1, 100.0%) and Davie (+4, 26.7%) experiencing the largest percentage gains. Durham (+126, 23.3%) and Forsyth (+66, 13.2%) Counties had the largest numeric gains. The number of primary care physicians remained stable in twenty counties, and thirty-one counties had a reduction in supply. Jones County had the largest numeric decrease (-8, -44.4%), followed by Johnston County (-4, -5.0%).

Figure 1: Yearly Increases in Primary Care Physicians (PCPs), 2000-2010

Physician Assistants, Nurse Practitioners, and Certified Nurse Midwives

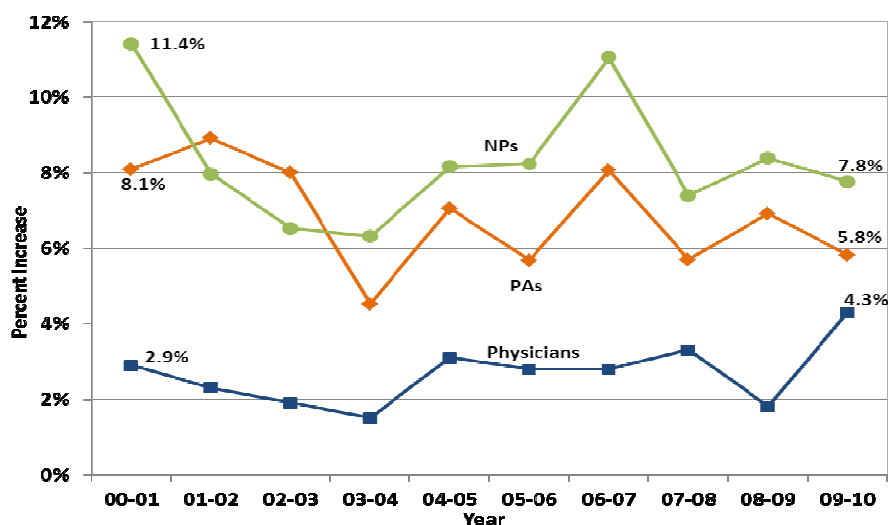

This year's 5.8% (+201) increase in **physician assistants** (PAs) marks another year of strong growth for the profession. In 2010, forty-eight counties expanded their PA supply with Jones (+1, 100.0%) doubling its supply, and Randolph County experiencing a 71.4% (+10) increase. Mitchell County added two PAs after having none in 2009. Twenty-eight counties experienced no change in their PA supply while twenty-four counties experienced decreases in their PA supply. Avery County lost its sole provider, joining six other counties that had no PAs in 2010 (Camden, Clay, Currituck, Gates, Hyde, and Tyrrell).

The 7.8% (+265) expansion in the **nurse practitioner** (NP) numbers in 2010 marked sixteen years of annual growth. Two counties, Camden and Perquimans⁸, had no nurse practitioners; these were the same counties that had none in 2009. Six counties had only one NP (Anson, Currituck, Gates, Hoke, Martin, and Tyrrell), with Anson and Currituck each having lost a nurse practitioner between 2009 and 2010. In total, fifty-seven counties increased their supply of nurse practitioners, while twenty-five lost providers and eighteen experienced no change.

⁸ Data are based on primary practice location; there may be NPs with secondary or other practice locations in these counties.

Figure 2 shows the annual growth for physicians, physician assistants (PAs), and nurse practitioners (NPs) over the past ten years. Between 2000 and 2010, the number of PAs and NPs grew rapidly, with both professions experiencing steady rates of increase since 2003. The 4.3% growth of physicians between 2009 and 2010 was the largest yearly increase over the past ten years, and with the exception of a small increase of 1.8% between 2008 and 2009, North Carolina's physician workforce has experienced steady increases in the rate of annual growth since 2005.

Figure 2: Yearly Increases in Physicians, Physician Assistants (PAs), and Nurse Practitioners (NPs), 2000-2010

The state's **certified nurse midwives** (CNMs) data showed a slight decrease (-2, -0.8%) in supply between 2009 and 2010, a contrast to last year's 5.3% (+12) growth rate. Overall, twelve counties saw their CNM supply rise, seventy-three experienced no change, and fifteen counties lost providers, with Johnston County losing its only practitioner.⁹ Hertford, Pender, and Wilson Counties each gained one practitioner after having none in 2009. The largest increase in CNMs was seen in Onslow County (+5, 125.0%). Forty-seven counties in North Carolina that had no CNMs in 2010.

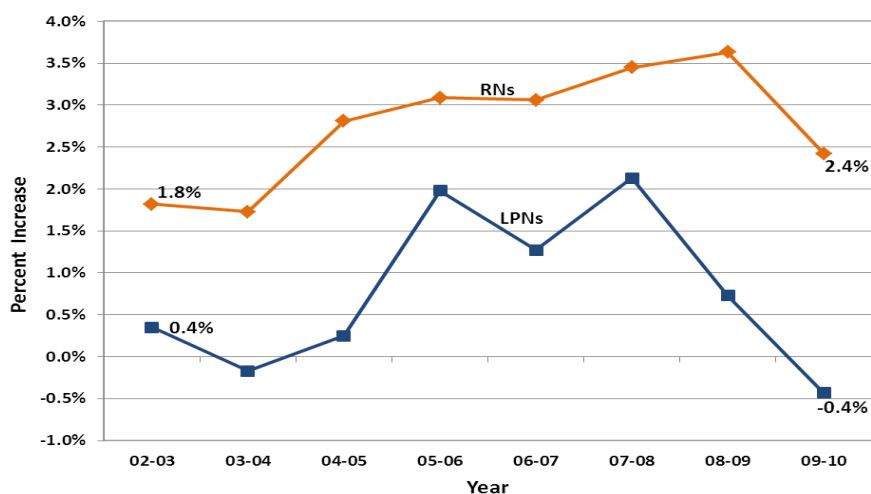

Registered Nurses and Licensed Practical Nurses

The **registered nurse** (RN) data showed a 2.4% (+2,203) rise in the number of RNs in the state between 2009 and 2010, a slightly lower growth rate when compared to recent years (Figure 3). Forty-nine counties expanded their RN supply in 2010, five counties had no change in their RN supply, and forty-six counties experienced a loss in the number of RNs. As in 2009, Mecklenburg had the greatest number of RNs, with 10,700 active in the county. Tyrrell, again, had the fewest with seven RNs, followed by Camden (18) and Gates (22).

⁹ Data are based on primary practice location; there may be CNMs with secondary or other practice locations in these counties.

The supply of **licensed practical nurses** (LPNs) decreased by -0.4% (-78) between 2009 and 2010. This year's decline in growth comes after a small increase of 0.7% experienced between 2008 and 2009 (Figure 3). Thirty-eight counties increased their numbers of LPNs, fifty-two counties lost LPNs and ten counties did not show any change. Tyrell experienced the greatest percentage gain (+1, 100.0%) and Perquimans had the greatest percentage loss (-8, -34.8%).

Figure 3: Yearly Increases in Registered Nurses (RNs) and Licensed Practical Nurses (LPNs), 2002-2010

Dentists and Dental Hygienists

Between 2009 and 2010, North Carolina experienced a 2.1% (+85) increase in its supply of **dentists**. Twenty-six counties showed reduced numbers of dentists between 2009 and 2010, thirty-three had no change in their supply of dentists, and forty-one counties saw their supply of dentists rise. Camden, Gates, Hyde, and Tyrrell remained the only four counties in the state without a dentist indicating a primary practice location. Bertie County had only one dentist in 2010. The largest percentage decrease in supply was seen in Jones County (-33.3%), which lost one dentist. The largest percentage increase was seen in Allegheny (100.0%) and Graham (100.0%) Counties, which each added one dentist, followed by Franklin County (75.0%), which gained three dentists.

In 2010, there was a 2.6% (+135) rise in the number of **dental hygienists** registered with the Board of Dental Examiners. This increase is slightly smaller than the increases seen in 2009 (3.6%) and 2008 (3.0%). Fifty-three counties showed growth in 2010 while twenty-seven counties experienced a decrease in their supply of hygienists. There were twenty counties with no change in the number of hygienists in 2010. Anson County had the largest percentage increase (+1, 50.0%). Allegheny, Currituck, Graham, and Jones Counties each lost one practitioner in 2010, taking their totals from three to two providers for the largest percentage decrease of -33.3%, and Rockingham had the largest decrease in numbers (-10, -14.5%).

Wake County had the largest increase in numbers (+17, 2.8%). Four counties had no active hygienist (Camden, Gates, Hyde and Tyrrell) in 2010.

Pharmacists

The total number of **licensed pharmacists** showed an increase of 0.7% (+61) between 2009 and 2010. *Figure 4* shows this is a smaller growth in the profession than seen in previous years. Between 2009 and 2010, the supply of pharmacists grew in fifty-four counties. Wake experienced the largest numerical increase (+70, 6.8%), while Allegheny experienced the largest percentage increase of 40.0% with the addition of two pharmacists. In 2010, Camden and Hyde were the only counties without a pharmacist indicating a practice location. Thirty-two counties lost pharmacists; the largest reduction in numbers occurred in Durham (-74, -11.2%) and Mecklenburg (-53, -5.6%). Gates (-1, -50.0%) and Tyrrell (-1, -50.0%) had the largest percentage decrease leaving these counties with only one practicing pharmacist. Fourteen counties had no change in the number of pharmacists.

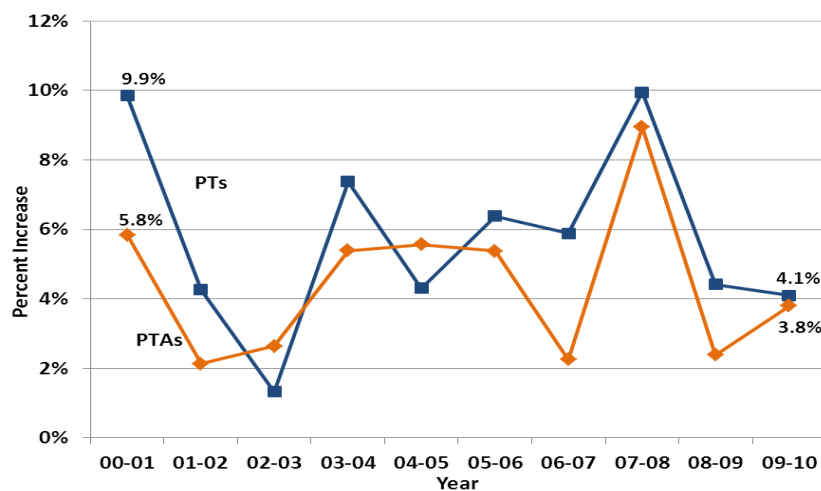

Figure 4: Yearly Increases in Pharmacists, 2000-2010

Physical Therapists and Physical Therapist Assistants

Between 2009 and 2010, the supply of licensed **physical therapists** (PTs) grew 4.1% (+201). Forty-six counties expanded their supply of PTs, twenty-two lost PTs, and thirty-two counties had no change in numbers. Four counties (Gates, Greene, Hyde, and Tyrrell) did not have a PT in 2010. The number of **physical therapist assistants** (PTAs) increased 3.8% (+85) in 2010, slightly larger than the 2.4% increase in 2009, but a small increase when compared to the 8.9% growth seen in 2008 (*Figure 5*). Fifty-two counties expanded their supply of PTAs, twenty lost PTAs, and twenty-eight counties had no change in numbers. Wake County experienced the largest numerical gain in PTAs (+8, 6.9%) and Carteret (-3, -20.0%), Brunswick (-3, -16.7%), and Gaston (-3, -5.1%) lost the greatest number of PTAs. Neither Camden nor Tyrrell counties had an active PTA in 2010.

Figure 5: Yearly Increases in Physical Therapists and Physical Therapist Assistants, 2000-2010

Occupational Therapists and Occupational Therapy Assistants

Occupational therapists (OTs) experienced a 4.0% (+99) increase between 2009 and 2010. Thirty-eight counties gained providers, twenty-eight lost providers, and thirty-four counties experienced no change. Graham, Pamlico and Washington counties lost their only providers, leaving seven counties with no active OTs and seven counties with only one OT. Franklin County (-7, -53.8%) had the greatest numerical loss and Mecklenburg (+32, 10.3%) added the greatest number of providers between 2009 and 2010. Mecklenburg also had the greatest number of OTs, with 344 registered in the county, followed by Wake with 323. In 2010, **occupational therapy assistants** (OTAs) experienced a 5.9% (+64) supply increase. Forty counties gained providers, twenty-six counties lost providers, and thirty-four counties experienced no change. Perquimans lost its only OTA. Of the seven counties without an occupational therapist, three (Perquimans, Tyrrell, and Washington) did not have an occupational therapy assistant. Mecklenburg County (+16, 19.0%) had the greatest increase in the number of OTAs and Buncombe County (-4, -12.1%) had the greatest numerical loss in of providers.

Psychologists and Psychological Associates

The number of **practicing psychologists** in North Carolina increased 3.2% (+61) between 2009 and 2010. This marks the sixth year of consistent growth in the profession. There were twenty-four counties without a practicing psychologist in 2010 and fifteen counties that had only one psychologist. Twenty-six counties lost psychologists, forty-seven counties had no change in numbers and twenty-seven counties gained practicing psychologists. Between 2009 and 2010, the supply of **psychological associates** decreased (-28, -3.0%); with the exception of the 4.2% spike between 2008 and 2009, this decrease follows the negative growth trend from prior years. Overall, twenty-six counties lost psychological associates and

sixteen had none in 2010. Fifty-three counties experienced no change, and twenty-one gained psychological associates. Fifteen counties had only one provider.

Podiatrists, Optometrists and Chiropractors

In 2010, the **podiatry** workforce increased by eight practitioners (3.0%). Eleven counties gained podiatrists, six counties lost podiatrists, and eighty-three had no change in numbers. Forty-four counties had no podiatrists in 2010. Warren lost its only provider. Together, Forsyth, Guilford, Mecklenburg, and Wake accounted for more than one-third (38.0%) of all podiatrists in the state (103 out of 271).

North Carolina's **optometrist** workforce expanded by 2.3% (+23) in 2010; slightly greater than the 1.9% (+19) increase of 2009. Twenty-five counties gained providers, fourteen lost providers, and sixty-one counties experienced no change. Eleven of the twelve counties that had no optometrists in 2009 also had no optometrists in 2010. Perquimans which had none in 2009, gained a provider in 2010. Montgomery doubled its supply by adding an additional optometrist. Craven County (-6, -30.0%) lost the greatest number of optometrists, while Rowan (+6, 42.9%) gained the most.

Between 2009 and 2010, North Carolina's count of **chiropractors** saw an increase of 17.3% (+229). Missing variable information for the past few years created the inability to determine activity status of many new to file chiropractors. This missing information was received in 2010 and these individuals are now included in the active file, resulting in what appears to be large increase in practitioners between 2009 and 2010. In 2010, forty-seven counties increased their number of providers, thirteen lost providers, and forty experienced no change. Alleghany and Gates each lost their sole provider, leaving thirteen counties without an active chiropractor in 2010. Of these thirteen, eight counties have remained without any chiropractors since 1979. Clay and Edgecombe, which had no practitioners in 2009, each gained one chiropractor in 2010 while Mecklenburg had the greatest numeric gains (+61, 27.1%). Ashe (-2, -40.0%) and Lee (-2, -25.0%) had the greatest numeric loss in 2010. Mecklenburg and Wake again accounted for almost a third of chiropractors in the state (31.9%, 497 out of 1,556).

Respiratory Therapists

The number of **respiratory therapists** (RTs) in North Carolina increased by 2.2% (+86) from 2009 to 2010. This represents a consistent rate of increase since the profession was added to the HPDS in 2004. In 2010, forty-seven counties gained providers, twenty-five lost providers, and twenty-eight had no change. Camden lost its sole provider between 2009 and 2010, and there were fourteen counties with no active respiratory therapists. Northampton gained one provider after having none in 2009. Durham County experienced the largest numeric change (+19, 9.1%) while Jones (+1, 100.0%) and Washington (+2, 100.0%) both doubled their supply. Wake County experienced the largest numeric decrease (-14, -5.2%).

CHANGES IN PRACTITIONER TO POPULATION RATIOS

North Carolina's population increased 2.0% between 2009 and 2010, slightly greater than the growth rate experienced between 2008 and 2009.¹⁰ Any examination of the changes in the supply and distribution of the health care workforce must take into account North Carolina's population growth rate, as well as the differences in population growth rates across counties of the state. To account for these factors, changes in health professional supply are illustrated in this section by examining the number of health care professionals per 10,000 people.¹¹ The practitioner per 10,000 population ratio provides a better mechanism to compare the supply and distribution of health professionals across varying geographic areas than the use of simple raw counts. Tables 3 through 13 (except Table 5) include the ten highest and lowest ranked North Carolina counties based on active physicians, primary care physicians, registered nurses, dentists, and pharmacists per 10,000 population.

Table 5 provides the physician and primary care physician ratios per 10,000 population based on American Medical Association (AMA) data for the United States, North Carolina, and selected states that border North Carolina. Caution should be used in comparing these figures to the ratios shown elsewhere in the data book because of differences in the data collection and reporting efforts at the AMA.

Table 14 shows the practitioner per 10,000 population ratios for all North Carolina counties in alphabetical order. Similar to Table 2, those licensed professionals for whom activity status is "unknown" are included in the "active" category. Professionals are only counted once and are located in counties based on primary practice location.

Physicians per 10,000 Population Ratio

The 2010 ratio of North Carolina's physicians per 10,000 population was 21.7, slightly greater than the ratio in 2009. The counties with the ten largest and ten smallest ratios in 2010 are included in Tables 3 and 4.

Table 3: Counties with the Largest Physicians per 10,000 Population Ratios, 2010 vs. 2009

2010 Rank	County	2010 Total Physicians	2010 Total Population	2010 Physicians per 10,000 Population	2009 Physicians per 10,000 Population	2009 Rank
1	Orange	1,216	134,325	90.5	88.9	1
2	Durham	1,962	268,925	73.0	64.6	2
3	Forsyth	1,567	351,798	44.5	40.7	4
4	Pitt	738	169,378	43.6	42.2	3
5	Buncombe	841	239,179	35.2	36.4	5
6	Moore	280	88,594	31.6	31.3	7
6	New Hanover	642	203,439	31.6	33.2	6
8	Mecklenburg	2,507	923,944	27.1	28.1	8
9	Pasquotank	108	40,664	26.6	22.1	16
10	Catawba	383	154,654	24.8	23.6	13

¹⁰ The population change reported here was calculated using the July 1, 2009 population estimate and the July 1, 2010 projection as reported by the Office of State Budget and Management (<http://www.osbm.state.nc.us/index.shtm>).

¹¹ Publications of this document prior to the 1999 edition reported population per health professional ratios.

Table 4: Counties with the Smallest Physicians per 10,000 Population Ratios, 2010 vs. 2009

2010 Rank	County	2010 Total Physicians	2010 Total Population	2010 Physicians per 10,000 Population	2009 Physicians per 10,000 Population	2009 Rank
100	Tyrrell	0	4,403	0.0	0.0	100
99	Gates	1	12,214	0.8	0.9	98
98	Warren	2	21,022	1.0	1.0	97
98	Camden	1	10,000	1.0	1.0	97
96	Hyde	1	5,813	1.7	0.0	100
95	Perquimans	3	13,486	2.2	1.5	95
94	Montgomery	7	27,796	2.5	2.5	93
93	Northampton	6	22,102	2.7	2.4	94
93	Hoke	13	47,298	2.7	2.6	92
91	Alexander	12	37,254	3.2	4.0	88

According to data from the AMA and the U.S. Census Bureau, as seen in Table 5, there were, on average, about 22.7 physicians per 10,000 population in the United States in 2008. This is down slightly from 23.4 in 2007. According to the AMA data, North Carolina's ratio was 21.5, slightly lower than the national average.

Table 5: Physicians & Primary Care Physicians per 10,000 Population, US and Selected States, 2008¹²

AMA Physician Data:	US Physician/ 10,000 Pop	NC Physician/ 10,000 Pop	GA Physician/ 10,000 Pop	SC Physician/ 10,000 Pop	TN Physician/ 10,000 Pop	VA Physician/ 10,000 Pop
Total Physicians ¹³	22.7	21.5	18.5	19.4	22.1	22.5
Primary Care Physicians ¹⁴	8.2	8.1	7.2	7.5	8.3	8.7

Compared to adjacent states, North Carolina has fewer physicians per 10,000 population than Tennessee and Virginia, but more physicians per population than Georgia and South Carolina. As mentioned earlier, the county- and state-level ratios using the NC Medical Board data are difficult to compare with the AMA figures due to differences in methodology and timing of data collection and reporting.

¹⁴ Active, non-federal physicians, excluding residents/fellows, with specialties of family practice, general practice, internal medicine, obstetrics/gynecology, and pediatrics.

Primary Care Physicians per 10,000 Population Ratio

On average, there were 9.4 primary care physicians per 10,000 population in North Carolina in 2010, a slight increase from 9.2 in 2009. Tables 6 and 7 illustrate the counties with the largest and the smallest primary care physicians per 10,000 population ratios.

Table 6: Counties with the Largest Primary Care Physicians per 10,000 Population Ratios, 2010 vs. 2009

2010 Rank	County	2010 Total Primary Care Physicians	2010 Total Population	2010 Primary Care Physicians per 10,000 Population	2009 Primary Care Physicians per 10,000 Population	2009 Rank

2010 Rank	County	2010 Total Primary Care Physicians	2010 Total Population	2010 Primary Care Physicians per 10,000 Population	2009 Primary Care Physicians per 10,000 Population	2009 Rank
100	Tyrrell	0	4,403	0.0	0.0	100
99	Gates	1	12,214	0.8	0.9	98
98	Warren	2	21,022	1.0	1.0	97
98	Camden	1	10,000	1.0	1.0	97
96	Perquimans	2	13,486	1.5	1.5	95
95	Hyde	1	5,813	1.7	0.0	100
94	Currituck	5	23,559	2.1	2.1	94
93	Northampton	5	22,102	2.3	2.4	92
92	Alexander	9	37,254	2.4	2.9	88
91	Montgomery	7	27,796	2.5	2.1	94

According to the national AMA data (see Table 5 on page 14) which, as mentioned previously, has differences in data collection and timing of collection when compared to the HPDS, there were 8.2 primary care physicians per 10,000 population in the United States in 2008. This compares to a ratio in North Carolina of 8.1 primary care physicians per 10,000 population.¹⁵ Tennessee and Virginia had larger numbers of primary care physicians per 10,000 population than North Carolina (with ratios of 8.3 and 8.7, respectively), and Georgia and South Carolina had smaller ratios (7.2 and 7.5, respectively).

¹⁵ Area Resource File, Bureau of Health Professions, National Center for Health Workforce Analysis, Health Resources and Services Administration, Department of Health and Human Services; data from AMA Master file, effective 12/31/08; resident total population estimates by state and national resident total population estimates from U.S. Census Bureau "Table 1: Annual Estimates of the Population for the United States and States, and for Puerto Rico: April 1, 2000 to July 1, 2010" <<http://www.census.gov/popest/states/tables/NST-PEST2010-01.xls>>, Accessed June 10, 2011.

Dentists per 10,000 Population Ratio

North Carolina had 4.4 dentists per 10,000 population in 2010, the same ratio as in 2009. National statistics show a ratio of 5.7 dentists per 10,000 population for the U.S. in 2010.¹⁶ Caution should be used in comparing these national figures to the ratios shown elsewhere in the book because of differences in the data collection efforts of the Bureau of Labor Statistics. Tables 8 and 9 report the counties with the ten largest and ten smallest supplies of dentists per 10,000 population ratios in 2010. Of the four counties tied for 100, three—Camden, Hyde and Tyrrell—have not had a dentist with a primary practice location in the county since 1989 or earlier, while Gates lost its only dentist in 2005.

Release Date: February 2011. (accessed: June 10, 2011).

Registered Nurses per 10,000 Population Ratio

The average number of registered nurses (RNs) per 10,000 population increased slightly from 96.9 in 2009 to 97.3 in 2010. North Carolina's supply of RNs per 10,000 population is slightly higher than the 2010 national statistic of 92.0 RNs per 10,000 population. Caution should be used in comparing these national figures to the ratios shown elsewhere in the book because of differences in the data collection efforts of the Bureau of Labor Statistics.¹⁷ Tables 10 and 11 represent the counties with the largest and the smallest ratio of registered nurses per 10,000 population in 2010.

Pharmacists per 10,000 Population Ratio

On average, the state had 9.1 licensed pharmacists per 10,000 population in 2010, slightly less than in 2009. The national ratio is 8.3 licensed pharmacists per 10,000 population.¹⁸ Again, the reader is cautioned to use care in comparing these national figures to the ratios shown elsewhere in the data book because of differences in the data collection efforts of the Bureau of Labor Statistics. See Tables 12 and 13 for the North Carolina counties ranking the highest and lowest pharmacists to population ratios.

Active Health Professionals per 10,000 Population Ratios for All Counties

Table 14 reports year 2010 data for selected active health professionals per 10,000 population ratios for physicians, primary care physicians,¹⁹ dentists, registered nurses, and pharmacists for all counties listed in alphabetical order.

¹⁸ Bureau of Labor Statistics; "Employed persons by detailed occupation, sex, race, and Hispanic origin;" <http://www.bls.gov/cps/cpsaat11.pdf>; (accessed: June 20, 2011). National resident total population estimates "Table 1: Annual Estimates of the Population for the United States and States, and for Puerto Rico: April 1, 2000 to July 1, 2010" <http://www.census.gov/popest/states/tables/NST-PEST2010-01.xls>. Release Date: February 2011. (accessed: June 10, 2011).

¹⁹ Primary care physicians are those who report their primary specialty as family practice, general practice, internal medicine, pediatrics, or obstetrics/gynecology.

Appendix I: Technical Notes on Methods

This report is based on registration data obtained on selected licensed health professional categories within North Carolina between November 1, 2009 and October 31, 2010.

Data on the licensed health professionals profiled in this report were collected from both initial and renewal licensure forms by their respective licensing boards. All boards supplied computerized copies of their files containing all necessary data to the Cecil G. Sheps Center for Health Services Research. All data files were run through a series of editing programs and procedures to check for inconsistencies.

Data were updated on a regular basis at each board with new licensees as well as changes in address. Physician data were checked and corrected for residency status using data supplied by hospitals with postgraduate medical education programs. Physician specialty data obtained from the 2010 *North Carolina Medical Society Roster* were used to check primary specialty codes. Physicians are the only profession assigned to county location based on ZIP code information.

Appendix II: Definition of Terms

Health Professions Related

- 1) Active Licensed individuals who are currently practicing in their respective field.
- 2) Inactive Licensed individuals who are retired, employed in another field or otherwise not practicing in their respective field.
- 3) Unknown Activity Status Licensed individuals for whom practice status is not reported. Experience has shown that these usually are persons just entering their field. They are therefore considered active.
- 4) In-State Licensed individuals who practice in North Carolina if they are active or who reside in North Carolina if they are inactive. If business county is missing for active individuals, mailing county is used.
- 5) Out-of-State Licensed individuals who practice outside of North Carolina if they are active or who reside outside of North Carolina if they are inactive. If business county is missing for active individuals, mailing county is used.
- 6) Physicians Doctors of medicine and doctors of osteopathy licensed with the N.C. Medical Board.
- 7) Federal physician..... Physician whose primary employer is the federal government and whose principal setting of primary practice is a health facility on a military installation, in a V.A. hospital, in the Public Health Service, in the Indian Health Service, or in another federal health facility. Federally-funded primary health care clinics serving the private sector are not considered a federal facility. Federal physicians are not required to be licensed by the N.C. Medical Board. Counts include only those federal physicians who hold active licenses from the North Carolina Medical Board.
- 8) Resident physician¹⁸ A physician who is presently enrolled in a postgraduate medical education training program at Duke University Medical Center, University of North Carolina at Chapel Hill-UNC Hospitals, East Carolina University-Pitt County Memorial Hospital, Wake Forest University Baptist Medical Center, Greensboro AHEC-Moses Cone Hospital, Charlotte AHEC-Carolinas Medical Center, South East AHEC¹⁹-New Hanover Regional Medical Center, Mountain AHEC in Asheville, Southern Regional AHEC in Fayetteville, and Cabarrus Memorial Hospital.

¹⁸ Definition of the North Carolina Medical Board.

¹⁹ Formerly Coastal AHEC

*Demographics*²⁰

- 102 BIRTHS: Resident live births. Live births occurring to residents of the area during the calendar year. Data downloaded from the State Center for Health Statistics starting in 1998. Data contained in Data Book since 1998 obtained from the N.C. Office of State Budget and Management population estimates. Data through 1997 downloaded from the LINC Data System; see <http://www.linc.state.nc.us/>. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- 103 DEATHS: Resident deaths. Deaths occurring to residents of the area during the calendar year. Data downloaded from the State Center for Health Statistics starting in 1998. Data contained in the 1998 Data Book obtained from the Office of State Planning population estimates. Data through 1997 downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- 104 LABORFORCE: Labor Force by Place of Residence. Estimates represent the sum of the average annual employed (variable 105) and unemployed (variable 106) persons by place of residence. "Place of residence" estimates were developed with data secured from establishments (i.e., place of work employment) and adjusted to remove the effects of commuting and multiple jobholding. The data through 1983 are based on the 1970 census commuting patterns through a residency adjustment. Beginning in 1984, the adjustments are based on the 1980 census commuting patterns. This variable is an annual average of monthly data for the calendar year. County level data are revised both one and two years after the reference year ends. The data are presented in unrounded form from 1986 forward to permit aggregation of county data (e.g., to the MSA or regional level), while the data for earlier years are rounded to the nearest ten, as they are in publications from the Labor Market Information Division. State level data are rounded to the nearest 100, both on LINC and in publications, and are periodically revised independent of the county revisions so that they differ significantly from the sum of counties. See also variable 201, MONTHLYLF, the monthly equivalent. 1990 to 1994 have been adjusted to the 1990 census. 1994 data are not strictly comparable to previous data due to a major revision in the Current Population Survey. For more information, call the Employment Security Commission at (919) 733-2936. Data for all years except 1999 downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Data for 1999 downloaded from: <http://www.ncesc.com>. Source: Department of Commerce.
- 105 EMPLOYED: Employment by Place of Residence. All persons who worked for pay or profit, or worked without pay for 15 hours or more per week in a family farm or business. Includes agricultural employment, nonagricultural wage and salary employment, unpaid family workers, and domestic workers in private households. "Place of residence" estimates were developed with data secured from establishments (i.e., place of work employment) and adjusted to remove the effects of commuting and multiple jobholding. This variable is an annual average of monthly data for the calendar year. County level data are revised both one and two years after the reference year ends. The data are presented in unrounded form from 1986 forward to permit aggregation of county data (e.g., to the MSA or regional level), while the data for earlier years are rounded to the nearest ten, as they are in publications from the Labor Market Information Division. State level data are rounded to the nearest 100, both on LINC and in publications, and are periodically revised independent of the county revisions so that they differ significantly from the sum of counties. 1990 to 1994 have been adjusted to the 1990 census. 1994 data are not strictly comparable to previous data due to a major redesign to the Current Population Survey. For more information, call the Employment Security Commission at (919) 733-2936. Data for all years except 1999 downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: Department of Commerce. Data for 1999 downloaded from: <http://www.ncesc.com>.

²⁰ Variable numbers, names and definitions are from the Log Into North Carolina (LINC) Database, N.C. State Data Center.

- 106 UNEMPLOYED: Unemployment by Place of Residence. This variable is an annual average of monthly data for the calendar year and is the estimated number of residents who did not work at all during the month but were able, available and looking for work. Includes all jobless persons looking for work, regardless of whether or not they qualify for unemployment insurance benefits. County level data are revised both one and two years after the reference year ends. The data are presented in unrounded form from 1986 forward to permit aggregation of county data (e.g., to the MSA or regional level), while the data for earlier years are rounded to the nearest ten, as they are in publications from the Labor Market Information Division. State level data are rounded to the nearest 100, both on LINC and in publications, and are periodically revised independent of the county revisions so that they differ significantly from the sum of counties. 1990 to 1994 have been adjusted to the 1990 census. 1994 data are not strictly comparable to previous data due to a major redesign to the Current Population Survey. For more information, call the Employment Security Commission at (919) 733-2936. Data for all years except 1999 downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: Department of Commerce. Data for 1999 downloaded from: <http://www.ncesc.com>.
- 107 UNEMPLRATE: Unemployment Rate by Place of Residence. The average annual number of unemployed (variable 106) as a percentage of the average annual civilian labor force (variable 104). County level data are revised both one and two years after the reference year ends. State level may be revised at other times as well. Prior to 1986, the rate is based on unemployment and labor force figures which have been rounded to the nearest 10 (nearest 100 for the state), as is the case in publications from the Labor Market Information Division. The purpose of this rounding is to emphasize the fact that the numbers are estimates. Beginning with 1986, the numbers are unrounded, to permit aggregation to the MSA or regional level; the unemployment rate is based on these unrounded numbers, and hence may differ slightly in some cases from the published rates. This variable is derived from variables 104 and 106 by the formula $100 * V106 / V104$. 1990 to 1994 have been adjusted to the 1990 census. 1994 data are not strictly comparable to previous data due to a major redesign to the Current Population Survey. For more information, call the Employment Security Commission at (919) 733-2936. Data for all years except 1999 downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: Department of Commerce. Data for 1999 downloaded from: <http://www.ncesc.com>.
- 136 INFANTDEATHS: Infant deaths. An infant death is defined as death of a live born infant under one year of age. The infant death rate is defined as resident infant deaths per 1,000 resident live births for the calendar year, which can be computed as variable 136 divided by variable 102, multiplied by 1,000. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics. Data appearing in the 2006 county profiles for infant mortality rate were mislabeled and were, in fact, 2005 figures.
- 501 PREGNANCIES: Pregnancies for females, all ages. The total number of the following events during the calendar year to resident women of all ages: live births, fetal deaths of 20 or more weeks gestation and induced abortions. Stillbirths of less than 20 weeks gestation are not included in this count. These figures are generated by adding data from birth certificates, fetal death certificates, and induced abortion reports from abortion providers. The sum of the counties does not always equal data for the state since the state includes persons whose county of residence is unknown. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- NA PREGNANCY RATE: Pregnancy rates are created by dividing pregnancies by female population ages 15-44 and multiplying by 1,000. This yields pregnancy rate per 1,000 women of childbearing age. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- 502 PREGTEEN: Pregnancies for females 15-19. The total number of the following events during the calendar year to resident women ages 15-19: live births, fetal deaths of 20 or more weeks gestation and induced abortions. Stillbirths of less than 20 weeks gestation are not included in this count. These figures are generated by adding data from birth certificates, fetal death

certificates, and induced abortion reports from abortion providers. The sum of the counties does not always equal data for the state since the state includes persons whose county of residence is unknown. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.

- NA TEEN PREGNANCY RATES (15-19): Pregnancy rates are created by dividing the number of teen pregnancies by female population ages 15-19 and multiplying by 1,000. This yields pregnancy rate per 1,000 women of this age group. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- 512 HOSPDISCH: General Hospital Discharges. Discharges of residents of the county in all short stay, acute care general hospitals in the state during the federal fiscal year. Excluded are federal and state hospitals, with the exception of one state facility which is included, UNC Hospitals, in Orange County. Normal ("well") newborn babies are excluded. Counties which border other states reflect under-reporting of discharges since only discharges to residents of the county from hospitals in North Carolina are counted. Counties affected are mainly Alleghany, Camden, Caswell, Cherokee, Clay, Columbus, Currituck, Dare, Gates, Hertford, Pasquotank, and Perquimans. See HOSPBEDGEN for beds included in short-stay, acute care, and general hospitals. Source: Department of Insurance. Compiled by the Cecil G. Sheps Center for Health Services Research for 1999, up to 1994, and since 2005; in 1997 and 1998, Department of Health and Human Services, Division of Health Service Regulation²¹; 1999 to 2005 data downloaded from LINC Data System; see <http://www.linc.state.nc.us>.
- 513 LONGTERMCARE: Nursing facility beds. This count includes beds licensed as nursing facility beds, meaning those offering a level of care less than that offered in an acute care hospital, but providing licensed nursing coverage 24 hours a day, seven days a week. In addition to these beds, licensed long-term nursing care (extended nursing care) beds in non-federal, non-state general hospitals are included. Data for each county represent the sum of the beds in the facilities located in that county. Data for the state reflect the sum of licensed beds in the counties. Long-term nursing care beds in both nursing facilities and hospitals are licensed annually for the calendar year. Source: State Medical Facilities Plan, Department of Health and Human Services, Division of Health Service Regulation; see <http://www.dhhs.state.nc.us/dhsr/ncsmfp/index.html>.
- 523 BIRTHLOWWT: Low-weight births under 2500 grams. Newborns weighing less than 2500 grams (5 pounds, 8 ounces) at birth, regardless of length of gestation, as reported on the birth certificate for the calendar year, to mothers who are residents. Low-weight births are at increased risk of infant death and illness. The term premature is used in a number of publications. Source: Department of Health and Human Services, North Carolina Public Health, State Center for Health Statistics.
- 524 HOSPBEDGEN: Beds in general hospitals. Defined as "beds in use" in hospitals, which are designated for short-stay use as licensed at the end of the third calendar quarter of the year. Included are beds for general medical or surgical use, beds that are for general psychiatric disorders, rehabilitation beds, eye-ear-nose-and-throat beds and pulmonary disease beds. Excluded are beds in all federal hospitals and state hospitals. An exception is the inclusion of beds in one state facility, UNC Hospitals, in Orange County. Data for each county represent the sum of the beds in the general hospitals located in that county. Data for the state reflect the sum of beds in the counties. Prior to 2008, data for general hospital beds were reported for the current year; however, it was discovered that the data were actually effective the year before (e.g., data reported as 2007 were effective 2006). Data Book editions 2008 and after will reflect the number of hospital beds for that year (e.g., 2008) unless otherwise noted. Source: State Medical Facilities Plan, Department of Health and Human Services, Division of Health Service Regulation; see <http://www.dhhs.state.nc.us/dhsr/ncsmfp/index.html>.

²¹ Formerly named Division of Facility Services.

- 710 MEDICAID: Count of Medicaid eligibles. An eligible is defined as a person who receives a Medicaid ID card authorizing Medicaid coverage for any portion of the state fiscal year. An eligible is counted in each county of residence during the fiscal year. The sum of the counties does not equal the state total since eligibles are unduplicated with respect to the state for the fiscal year. Data for 2005 and previous editions represented an unduplicated count for the state and counties. Data appearing in 2005 for Medicaid eligibles were mislabeled as 2004 and were, in fact, 2005 figures. Data downloaded from the Division of Medical Assistance; see <http://www.dhhs.state.nc.us/dma>. Source: Division of Medical Assistance, Department of Health and Human Services.
- 3001 PERSINC: Total personal income by place of residence (000s). The income received by, or on behalf of, all the residents of the area. Includes income received by persons from all sources - from participation in production, from transfer payments, from government and business, and from government interest (which is treated like a transfer payment). Personal income is the sum of wage and salary disbursements, other labor income, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments, less personal contributions for social insurance. For counting income, persons are defined as individuals, nonprofit institutions, private non-insured welfare funds, and private trust funds. The last three are referred to as "quasi-individuals." Proprietors' income is treated in its entirety as received by individuals. Life insurance carriers and private non-insured pension funds are not counted as persons, but their saving is credited to persons. Personal income is entirely different from money income, which is the measure of income used by Census and CPS. Source: Department of Commerce, Bureau of Economic Analysis. Data for 1996 through 1999 and 2003 editions downloaded from Bureau of Economic Analysis at <http://www.bea.doc.gov/>. Data for all other years downloaded from the LINC Data System; see <http://www.linc.state.nc.us>.
- 3004 BEAPOP: Population estimate by place of residence (BEA denominator). BEA uses the U.S. Census Bureau county population totals as of July 1. Population is measured at midyear, whereas income is measured as a flow over the year. The state population figure used by BEA will agree with the the U.S. Census Bureau county estimates but may not be the most current state level figure released by the Census Bureau. These population figures should be used only with BEA income figures to calculate per capita estimates. Source: Department of Commerce, Bureau of Economic Analysis. Data for 1996 through 1999 and 2003 editions downloaded from Bureau of Economic Analysis at <http://www.bea.doc.gov/>. Data for all other years downloaded from the LINC Data System; see <http://www.linc.state.nc.us>.
- 3005 PERCAPINC: Per capita income by place of residence. The total personal income of residents of an area divided by the resident population of the area. See BEAPOP and PERSINC. Per capita personal income serves as an indicator of the quality of consumer markets and of the economic well-being of the residents of an area. It should be used with caution for several reasons: (1) An unusually high or low per capita income may be the temporary result of unusual conditions such as a bumper crop, a major construction project, or a catastrophe. In some cases, a high per capita income is not representative of the standard of living in an area. Conversely a county with a large institutional population may show an unusually low per capita income. (2) Population is measured at mid-year and income is measured as a flow over the year, so a significant change in population during the year could cause a distortion in the per capita figures. (3) Farm proprietors' income reflects return from current production; it does not measure current cash flows. Sales out of inventories, though included in current gross farm income, are excluded from net farm income because they represent income from a previous year's production. Additions to inventories are included in net farm income at current market prices. (4) In counties that are characterized by small population and almost total dependence upon farming, the per capita income will react more sharply to the vagaries in weather, world market demand, and changing government policies related to agriculture than in counties where the sources of income are more

diversified. (5) Substantial differences between BEA estimates of per capita income and Census Bureau estimates are due to differences in definition of income, collection mode, and method of computation. The BEA data are derived primarily from administrative records, while the census data are self reports of individuals. This variable is derived from variables 3001 and 3004 as $1000 * V3001 / V3004$. Data for 1996 through 1999 and 2003 editions downloaded from Bureau of Economic Analysis at <http://www.bea.doc.gov>. Data for all other years downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: Department of Commerce, Bureau of Economic Analysis.

- 5001 POPULATION (Census/Estimate/Projection). Depending on the year, this is the corrected census count (April 1, 1970, 1980, 1990 or 2000), or the estimate or projection from the State Demographer (April 1, 2000, 2010; July 1, other years). All years subsequent are projected. A projection differs from an estimate in that it relies on certain assumptions about long-term trends in data, which are not yet available, while an estimate is always based on data from predictor variables, which are available for the estimate year. See variables 401-424 for age/race/sex breakdown of the same data for counties (available through the "Population by age/race/sex" topic report option on the main menu). The sum of variables 401-424 for 1990 will not equal variable 5001 for the counties of Buncombe, Cleveland, Durham, Mecklenburg, Pitt and Robeson because the corrections were released after the 1990 data were adjusted. Several municipalities, counties, and the state had corrections to the 1990 population from the Census Bureau. Data for 1997 through 2000 and the 2003 editions downloaded from the Office of State Planning. Population data for age/race/sex breakdowns were not available for the 2010 Data Book publication and 2009 population data were used for these variables instead. However, county and state level projections of total population were available for 2010, and were used to calculate all practitioner to population ratios in the 2010 edition. Data for all other years downloaded from the LINC Data System; see <http://www.linc.state.nc.us>. Source: N.C. Office of State Budget and Management.

Location

- 1) MSA²² "Core Based Statistical Area" (CBSA) is the OMB's collective term for Metropolitan and Micropolitan statistical areas. OMB has not defined an affirmative title for areas outside CBSAs. Source: U.S. Census Bureau and Office of Management and Budget, 2008.

Appendix III: Procedures for Requesting Additional Information

Procedures for Requesting Additional Information

This appendix describes the health professions information available through the North Carolina Health Professions Data System at the Cecil G. Sheps Center for Health Services Research and the necessary procedures for obtaining data.

The Sheps Center maintains health professions data files through a cooperative effort with each licensing board for the following categories of health professionals licensed in North Carolina:

- Certified Nurse Midwives
- Chiropractors
- Dental Hygienists
- Dentists
- Nurses (RNs and LPNs)
- Nurse Practitioners
- Occupational Therapists
- Occupational Therapy Assistants
- Optometrists
- Pharmacists
- Physical Therapists
- Physical Therapist Assistants
- Physicians, includes MDs and DOs licensed by the North Carolina Medical Board
- Physicians in Residency Training
- Physician Assistants
- Podiatrists
- Practicing Psychologists
- Psychological Associates
- Respiratory Therapists

Although the Sheps Center does have files for each year since 1975²⁴, the data prior to 1979 are relatively inaccurate, and therefore their use is discouraged.

Health professionals provide the data to the respective licensing boards at the time of initial license or renewal. The data are tabulated by the Sheps Center, but at all times remain the property of the boards. The data are confidential because they include detailed information on the individuals licensed.

²⁴ Certified nurse midwife data are available starting from 1985; respiratory therapist data are available starting from 2004. Occupational therapist and occupational therapy assistant data are available starting from 2006.

Therefore, any requests for names, addresses, or other information that would lead to identification of any individuals cannot be honored without the prior written approval of the appropriate licensing board.

Data are provided in several formats: electronic mailing lists, cross-tabulations, frequencies and graphic representations. A two-week interval is normally required to process data requests, with a minimum charge dependent upon the type of output. Please visit the Health Professions Data System web site at <http://www.shepscenter.unc.edu/hp> for more information.

When board approval is necessary, the following steps should be taken:

1. Contact the Sheps Center's N.C. Health Profession Data System Coordinator by phone (919) 966-7112, email (nchp@unc.edu) or letter to discuss the details or your request. Direct verbal or written approval from the executive officer of the appropriate board is required before any data can be released by the Sheps Center.
2. A letter should be sent to the executive officer of the appropriate board (see list on following pages) explaining the need for the data in question, and the preferred format of the data. If the data are for an announcement or a survey, a copy of the brochure or questionnaire to be sent is usually helpful. The letter should request that approval be granted to the Sheps Center to provide the data. Sending a copy of the letter to the Sheps Center Coordinator is recommended.

Board approval is normally not required if the data requested do not identify individuals. For requests of this type only a letter, email or telephone call to the Coordinator is required. A phone call is helpful to ensure that your request is clear.

If data are required immediately, the request should indicate the urgency. An urgent request will be processed as soon as it can be scheduled into the workload, and an additional charge will be assessed. However, no assurance can be given as to delivery date earlier than two weeks after the request has been received. Whenever possible, a two-week interval should be anticipated for the processing of routine requests; a longer period will be required if extensive programming is needed.

Addresses of Health Professions Licensing Boards

N.C. Board of Chiropractic Examiners
174 Church Street
Concord, NC 28025-4759
Ms. Carol Hall, Executive Secretary

Data Listing for Each Profession

The following pages list the data available for each profession. The professions are sorted in alphabetical order. When data are not available for all years, the years for which data are available will be indicated in parentheses.

2010 N.C. Health Professions Data Book

Data Available for Chiropractors, 1979-2010*

1. *License/certification number*
2. *Licensing date* (month and year)
3. *Name*
first
middle initial
last
4. *Mailing address* (1984-2010)
office name (if business address)
street
city
state
ZIP code
county
AHEC
HSA
5. *Office address (if different from mailing address)* (1984-1999)
office name
street
city
state
ZIP code
county
AHEC
HSA
6. *Home address* (1979-1983)
street
city
state
ZIP code
county
AHEC
HSA
7. *Business address* (1979-1983)
business name
street
city
state
ZIP code
county
AHEC
HSA
8. *Preferred mailing address* (1979-1983)
1 = home
2 = business
• = unknown
9. *Location codes (based on mailing address if individual is inactive or if the business address is unknown; otherwise based on the business address)*
county
state
1 = in state
2 = out of state
-9 = state unknown
AHEC
HSA
10. *Birth year*
11. *Gender*
1 = male
2 = female
• = unknown
12. *Race*
1 = White
2 = Black
3 = American Indian
4 = Asian
5 = Other
6 = Hispanic
• = Unknown
13. *Spanish origin* (1979-1983)
1 = yes
2 = no
• = unknown
14. *Basic professional education-state*
15. *Basic professional education-school*
16. *Basic professional education-year*
17. *Activity status*
1 = active
2 = inactive
• = unknown
18. *Reason inactive* (1982-2010)
1 = working in other field
2 = retired
3 = homemaker
4 = in professional training
5 = other
• = unknown
- Reason inactive* (1979-1981)
1 = other work - wants work in profession
2 = other work - doesn't want work in profession
3 = not working - wants work in profession
4 = doesn't want work -retired
5 = doesn't want work - homemaker
6 = doesn't want work - training
7 = doesn't want work - other reason
• = reason unknown
19. *Primary specialty*
1 = neurology
2 = orthopedics
3 = roentgenology
4 = other specialty
0 = none
• = unknown
20. *Secondary specialty* (1979-1981, 1984-2010)
21. *Tertiary specialty* (1979-1981)

22. *Form of employment* (1982-2010)

- 1 = solo—self employed
- 2 = non-solo—self employed
- 3 = individual practitioner
- 4 = partnership or group
- 5 = local government
- 6 = county government
- 7 = state government
- 8 = Federal government
- 9 = other
- = unknown

Form of employment (1979-1981)

Self employed:

- 11 = solo
- 12 = partnership or group

Non-governmental employer:

- 21 = individual practice
- 22 = retail or wholesale trade
- 23 = partnership or group
- 24 = group health plan facility
- 25 = other

Governmental employer:

- 31 = local
- 32 = county
- 33 = state
- 34 = federal-civilian
- 35 = federal-military

Miscellaneous:

- 41 = unpaid worker
- 44 = other
- = unknown

23. *Employment setting* (1982-2010)

Nonfederal:

- 11 = hospital
- 12 = nursing home
- 13 = free-standing clinic
- 14 = group pre-paid health facility
- 15 = practitioner's office
- 16 = other

Federal:

- 21 = military
- 22 = V.A., public health, Indian health
- 23 = other

Miscellaneous:

- 30 = school, college, university or other educational institution
- 71 = other type of setting
- = unknown

Employment setting (1979-1981)

Nonfederal:

- 11 = hospital
- 12 = nursing home
- 13 = clinic
- 14 = group health facility
- 15 = practitioner's office
- 16 = other

Federal:

- 21 = military
- 22 = other

Schools:

- 31 = medicine, dentistry
- 32 = nursing
- 33 = other health profession
- 34 = school, handicapped
- 35 = school, elementary or secondary
- 36 = other

Miscellaneous:

- 41 = patient's home
- 42 = medical research facility
- 43 = professional or allied health association
- 44 = administrative health agency

Business establishments:

- 51 = manufacturing or industrial
- 52 = retail, wholesale, or other business

Other settings:

- 71 = other
- = unknown

- 24. *Total hours practiced per average week*
- 25. *Percent time in patient care*
- 26. *Hours per week in retailing* (1979-1981)
- 27. *Hours per week in teaching* (1979-1981)
- 28. *Hours per week in research* (1979-1981)
- 29. *Hours per week in administration* (1979-1981)
- 30. *Hours per week in other activity* (1979-1981)
- 31. *Number of weeks worked past 12 months* (1979-1981)

* If a variable is not available for all years, it will be noted in parentheses.

1. *Approval number*
2. *Year of Approval*
3. *Primary Worksite*
 - site name
 - street
 - city
 - state
 - ZIP code
 - county
 - AHEC
 - HSA
4. *Secondary Worksite*
 - site name
 - street
 - city
 - state
 - ZIP code
 - county
 - AHEC
 - HSA
5. *Home ZIP*
6. *Basic professional education-school*
7. *Basic professional education-year*
8. *Location codes (based on primary worksite)*
 - county
 - state
 - 1 = in-state
 - 2 = out of state
 - 9 = state unknown
 - AHEC
 - HSA

<p>* If a variable is not available for all years, it will be noted in parentheses.</p>

2010 N.C. Health Professions Data Book

Data Available for Dental Hygienists, 1979-1984, 1986-2010*
