

North Carolina Providers: Supply and Distribution by Race

Jennifer King

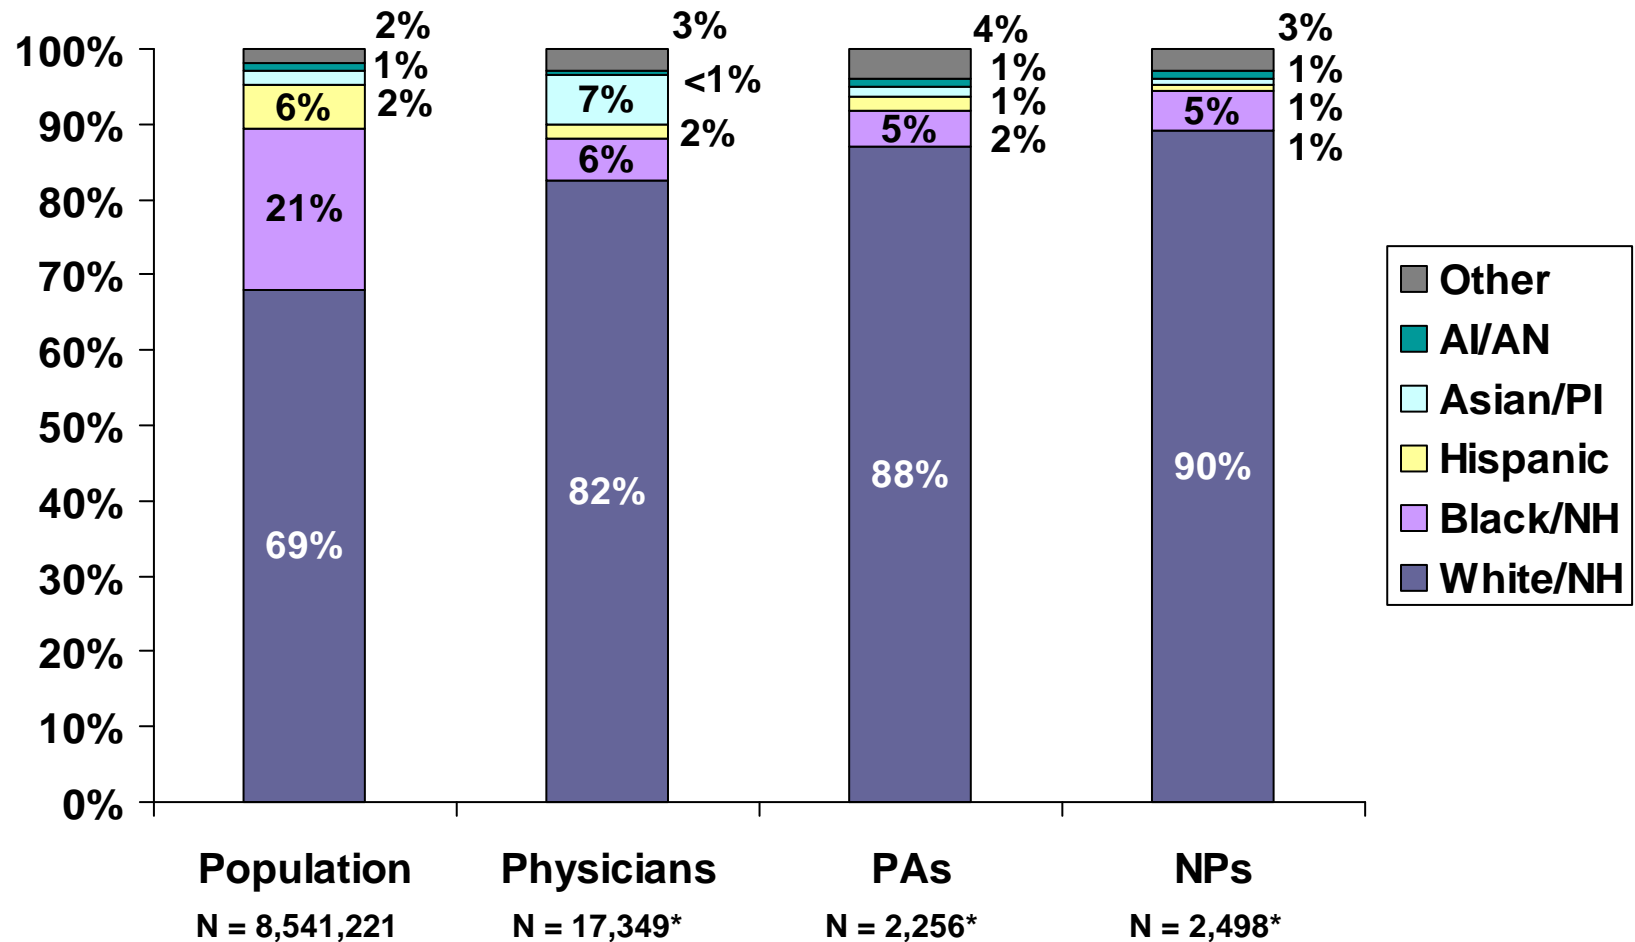

July 27, 2006

CECIL G. **sheps** CENTER
FOR HEALTH SERVICES RESEARCH • UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Overview

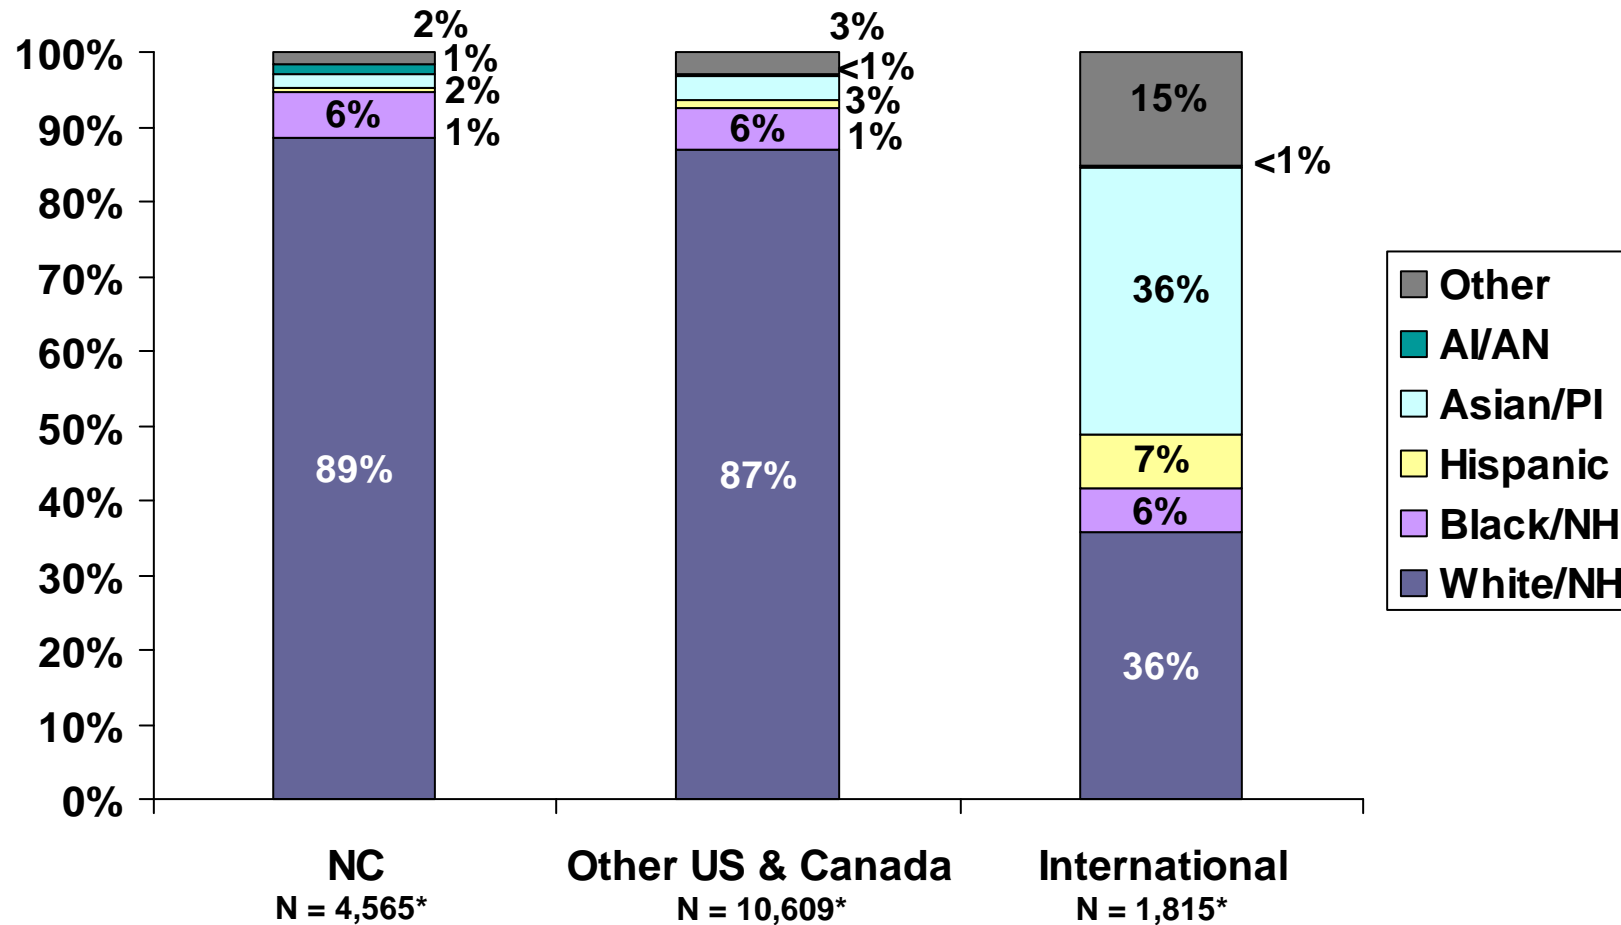

- Race of NC providers compared to NC population
- Rates of practicing in rural and underserved areas by race
- Geographic distribution of underrepresented NC physicians compared to population

Race of Population and Providers, North Carolina 2004

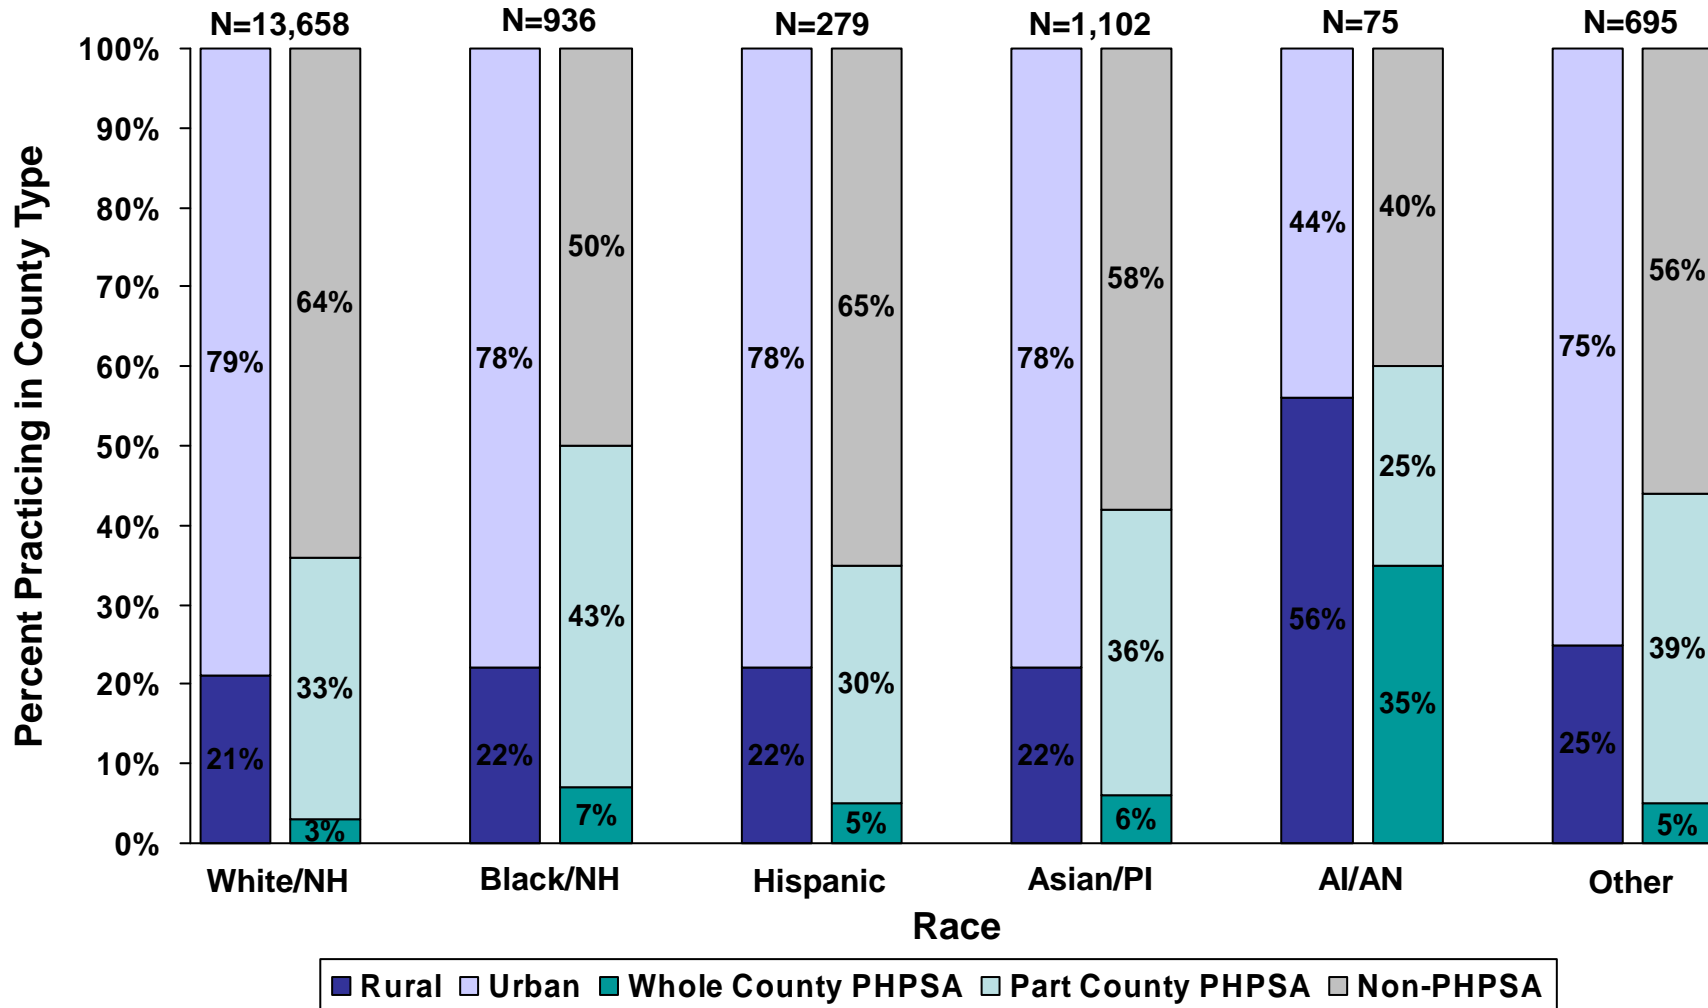

Source: North Carolina Health Professions Data System and US Census. Note: Counts include active, in-state, non-federal physicians, PAs, and NPs. Race data were missing for 604 physicians, 212 NPs, and 215 PAs; percentages are based on the providers for whom race information was available. AI/AN is American Indian/Alaskan Native. PI is Pacific Islander. NH is Non-Hispanic.

Race of Physicians by Medical School Location, North Carolina 2003

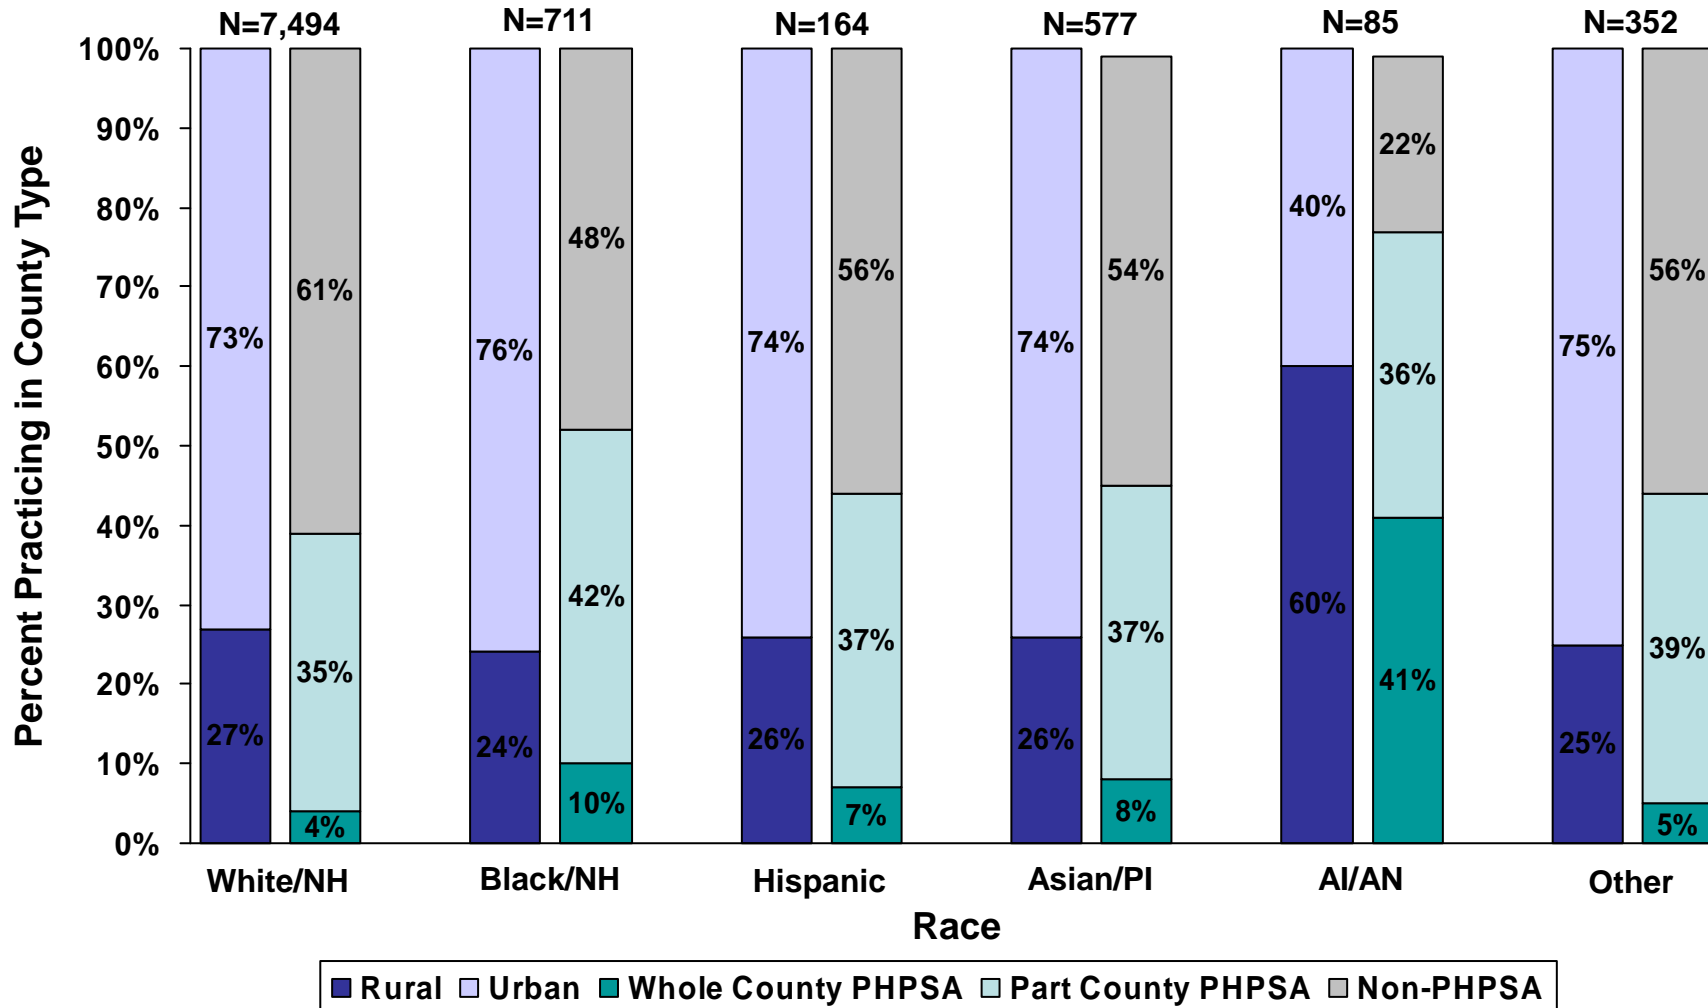

Source: North Carolina Health Professions Data System. Note: Counts include active, in-state, non-federal physicians. Medical school location data were missing for 101 physicians and race data were missing for 529 physicians; percentages are based on the physicians for whom both race and medical school information were available. AI/AN is American Indian/Alaskan Native. PI is Pacific Islander. NH is non-Hispanic.

Share of Physicians Practicing in Rural and Persistent Shortage Areas, North Carolina 2004

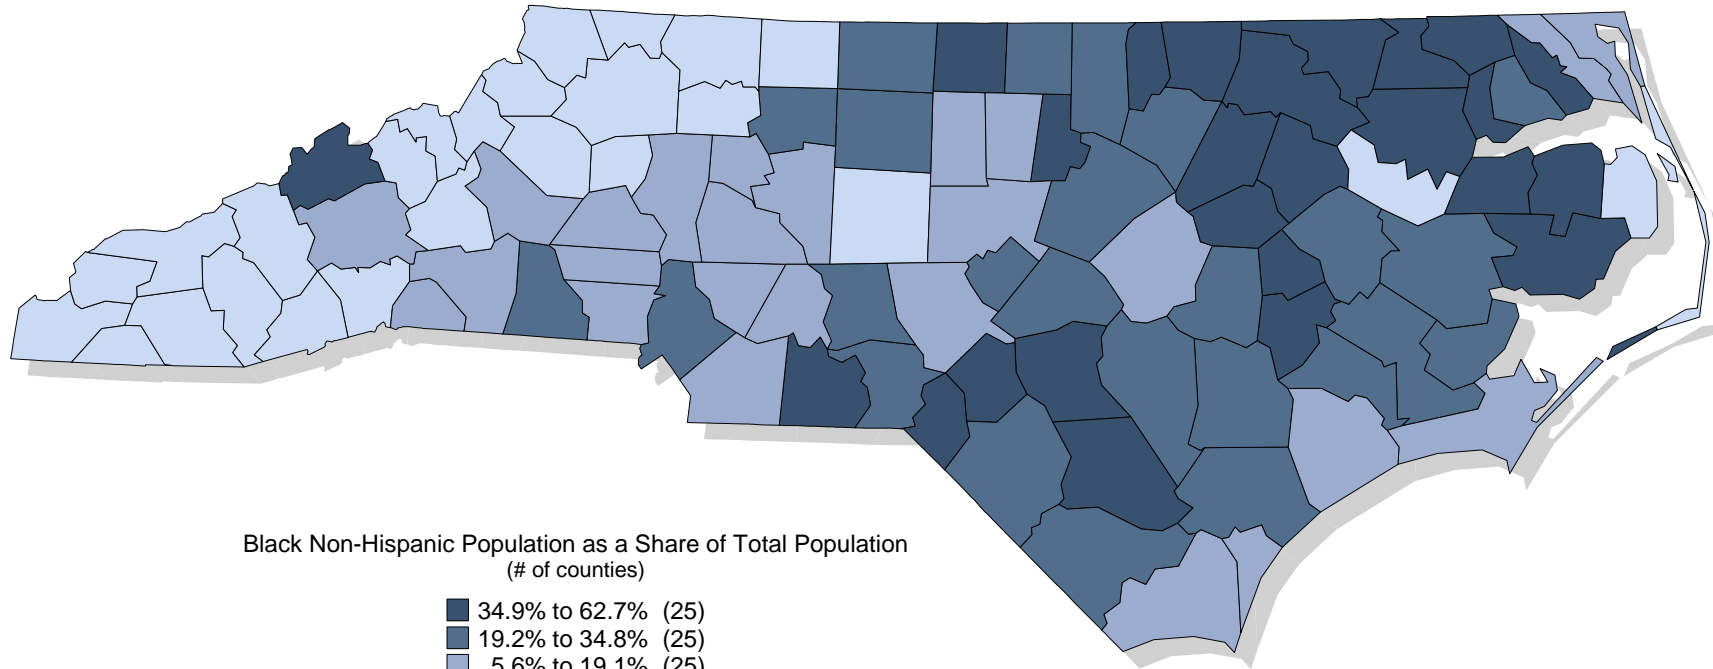

Source: North Carolina Health Professions Data System and US Census. Note: Counts include active, in-state, non-federal physicians. Race data was missing for 604 physicians. PI is Pacific Islander. AI/AN is American Indian/Alaskan Native. NH is non-Hispanic. PHPSA is Persistent Health Professional Shortage Area, a county that has been designated a shortage area by the federal government in 6 of the last 7 years.

Share of Primary Care Physicians, PAs, and NPs Practicing in Rural and Persistent Shortage Areas, North Carolina 2004

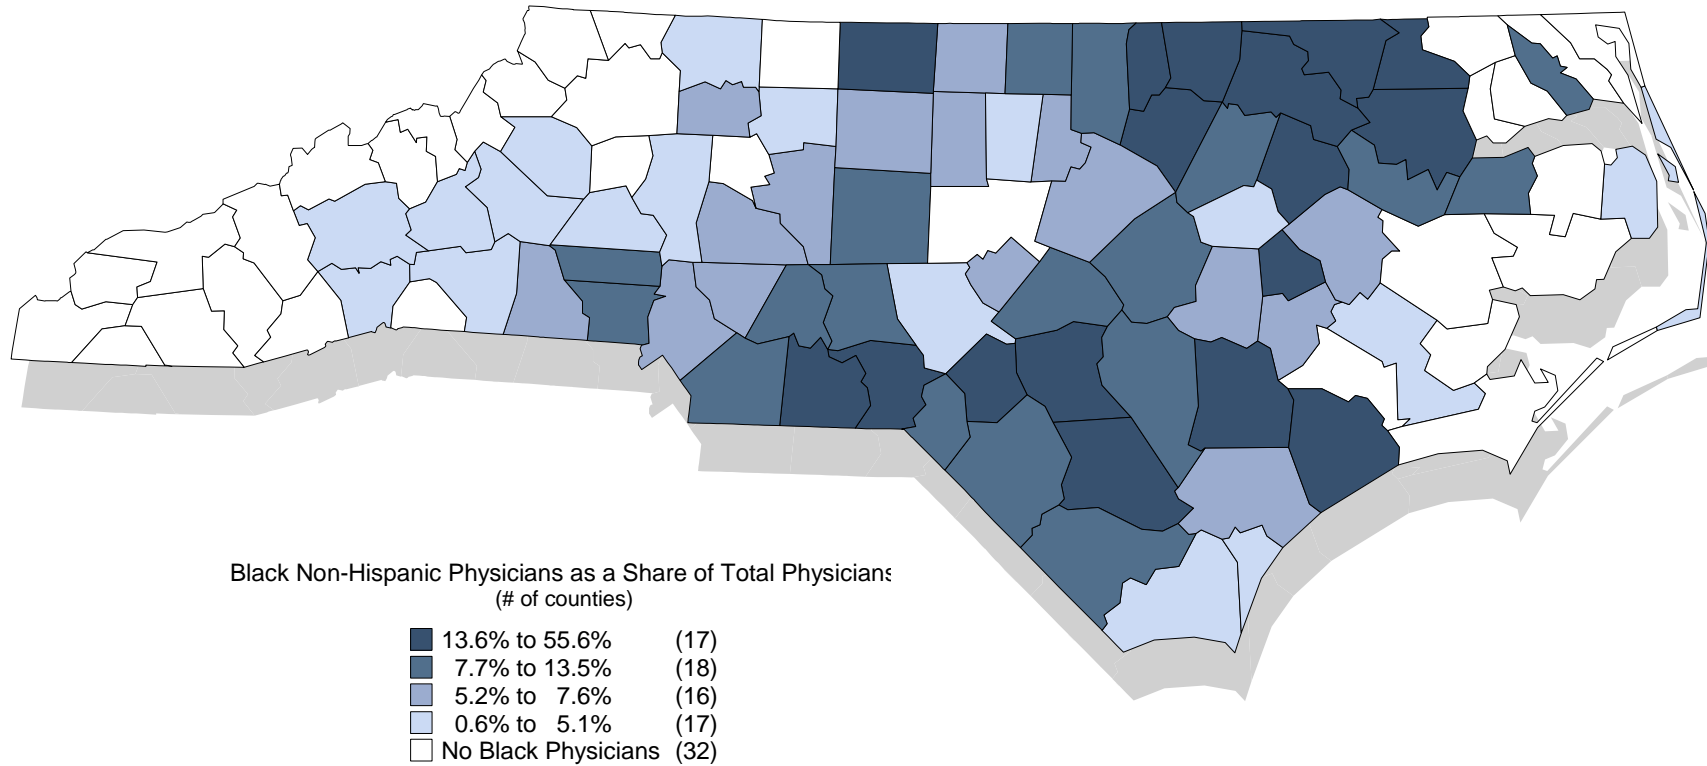

Source: North Carolina Health Professions Data System and US Census. Note: Counts include active, in-state, non-federal providers who indicate a primary care specialty. PI is Pacific Islander. AI/AN is American Indian/Alaskan Native. NH is non-Hispanic. PHPSA is Persistent Health Professional Shortage Area, a county that has been designated a shortage area by the federal government in 6 of the last 7 years.

Black Non-Hispanic Population as a Share of Total Population, North Carolina 2004

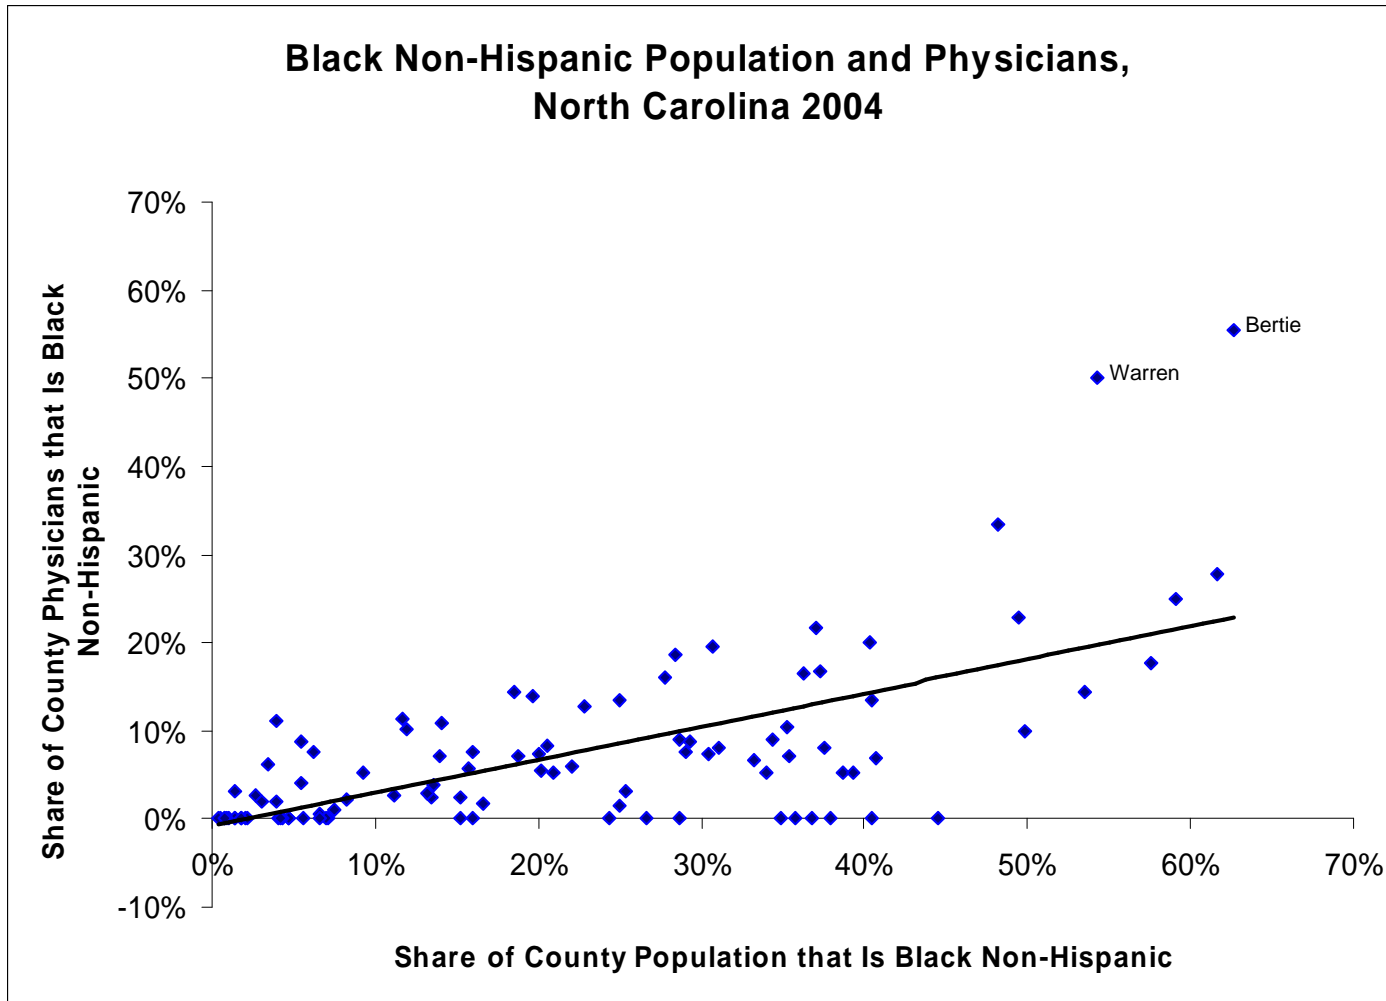

Black Non-Hispanic Physicians as a Share of Total Physicians, North Carolina 2004

Produced by: North Carolina Health Professions Data System, Cecil G. Sheps Center for Health Services Research, University of North Carolina at Chapel Hill with data derived from the NC Medical Board, 2004.

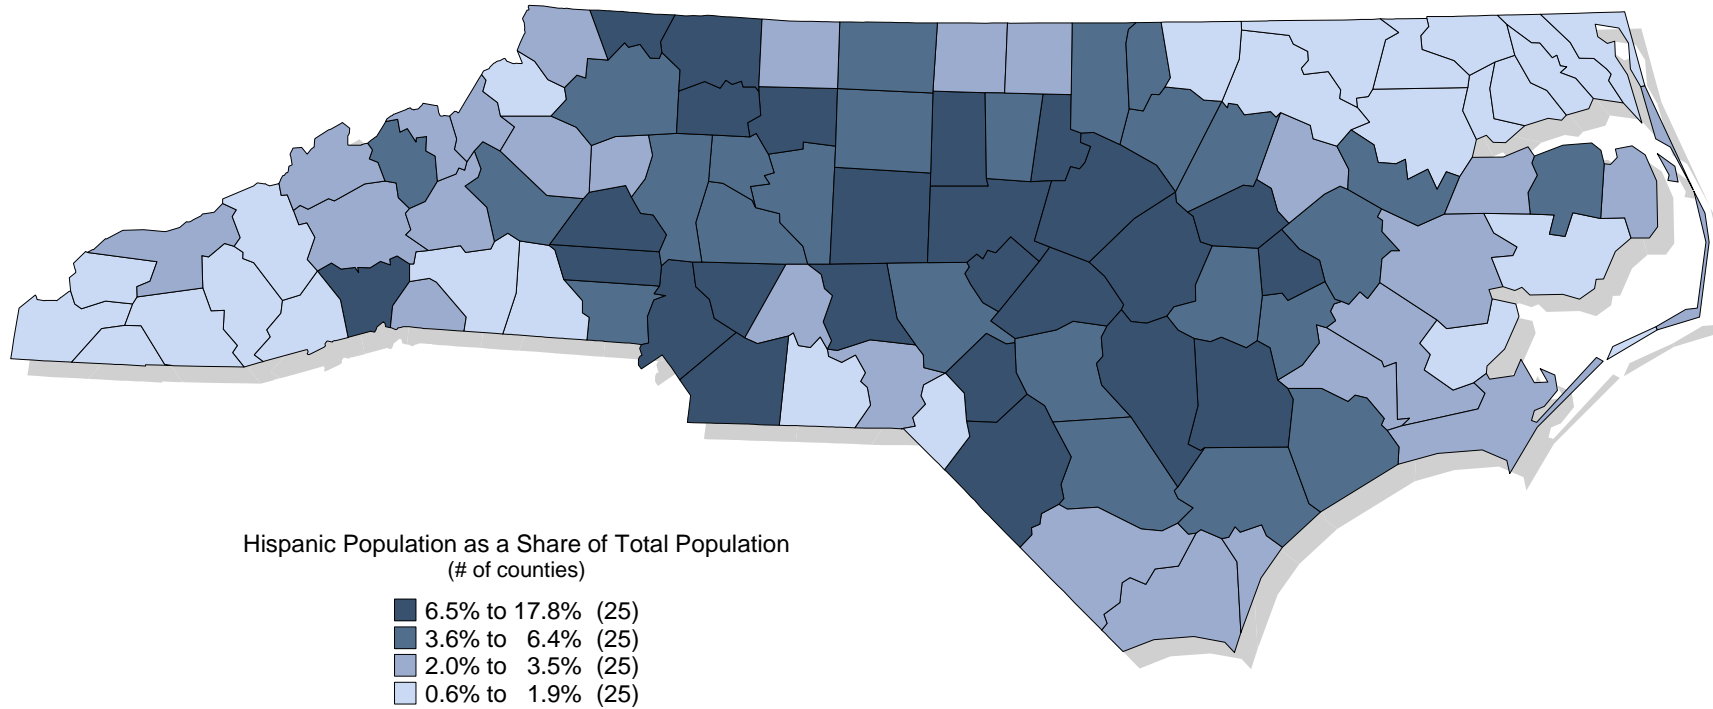

*Counts include active, in-state, non-federal physicians who reported their race as "Black, non-Hispanic" on their licensure form.

Do Black Non-Hispanic physicians practice in counties where Black Non-Hispanics live?

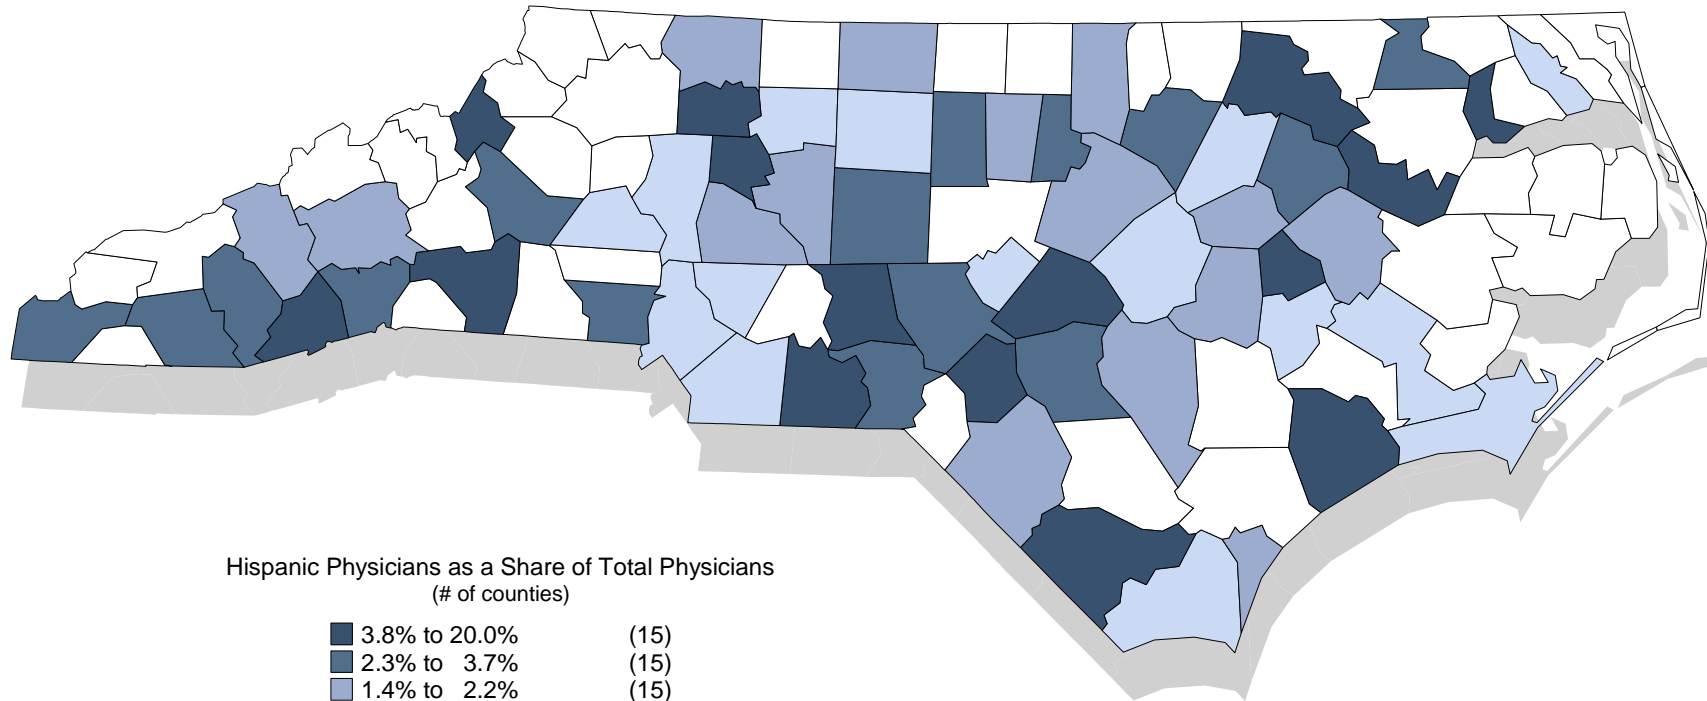

Source: North Carolina Health Professions Data System and US Census.
Note: Counts include active, in-state, non-federal physicians.

Hispanic Population as a Share of Total Population, North Carolina 2004

Hispanic Physicians as a Share of Total Physicians, North Carolina 2004

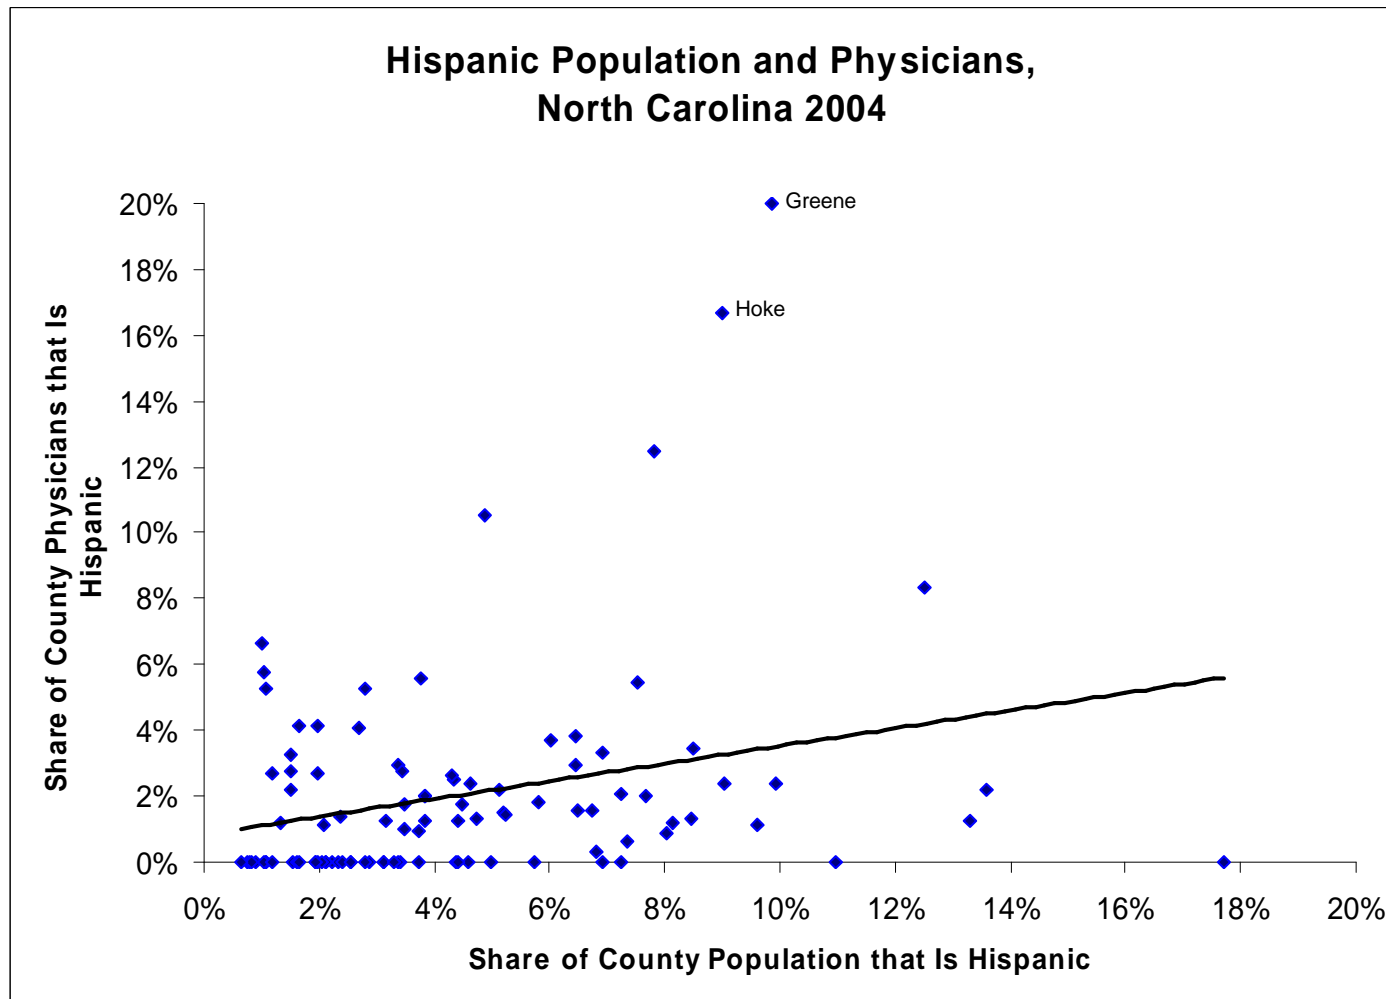

Hispanic Physicians as a Share of Total Physicians
(# of counties)

■ 3.8% to 20.0%	(15)
■ 2.3% to 3.7%	(15)
■ 1.4% to 2.2%	(15)
■ 0.3% to 1.3%	(15)
□ No Hispanic Physicians	(40)

Note: Counts include active, in-state, non-federal physicians.

Distribution of AI/AN Population and Physicians

- Robeson County is home to
 - 47% of NC's AI/AN population
 - 31% of NC's AI/AN physicians
- 12 counties are home to
 - 31% of NC's AI/AN population (1%-5% each)
 - 28% of NC's AI/AN physicians (0%-1% each)
- 87 counties are home to
 - 22% of NC's AI/AN population (<1% each)
 - 41% of NC's AI/AN physicians (<1% each)

American Indian/Alaskan Native Physicians as a Share of Total Physicians, North Carolina 2004

American Indian/Alaskan Native (AI/AN) Physicians as a Share of Total Physicians
(# of counties)

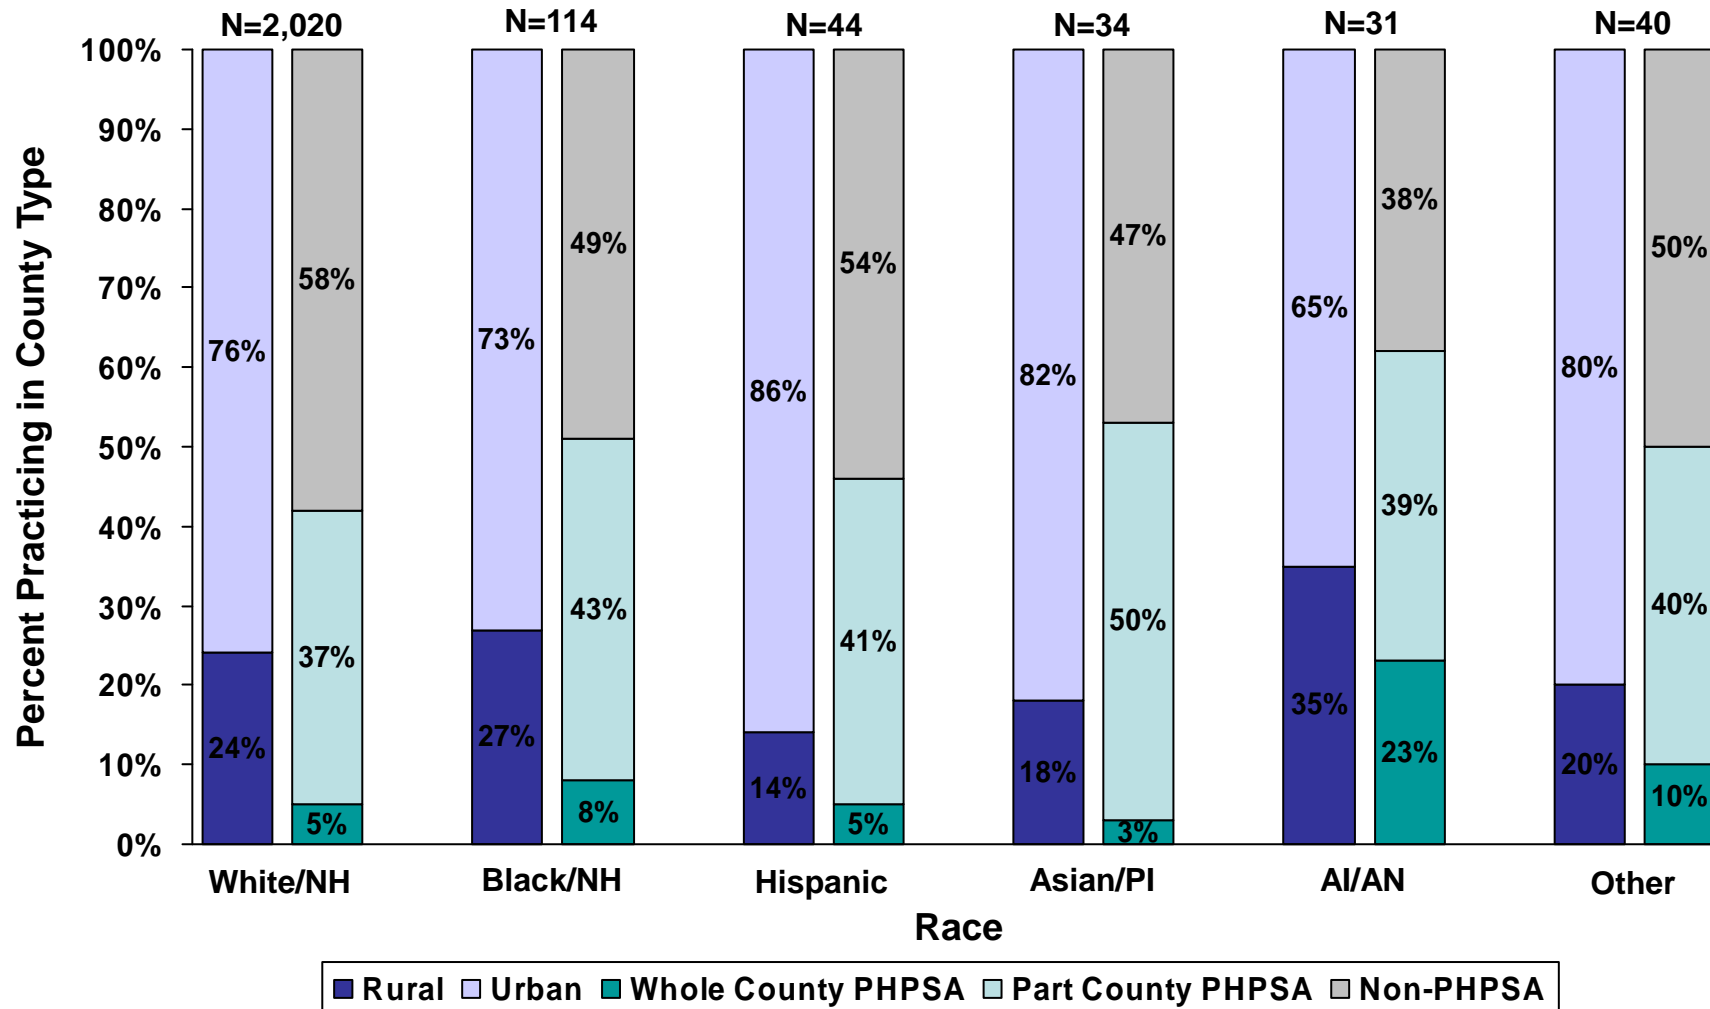

2.0% to 18.3%	(7)
1.1% to 2.0%	(7)
0.4% to 1.0%	(6)
0.6% to 0.3%	(7)
No AI/AN Physicians	(73)

Many nonwhites live in NC counties with no physician of the same race

- 78,013 Black/NHs in 32 counties
- 48,217 Hispanics in 40 counties
- 22,727 AI/ANs in 73 counties
- 1,108 Asian/PIs in 14 counties

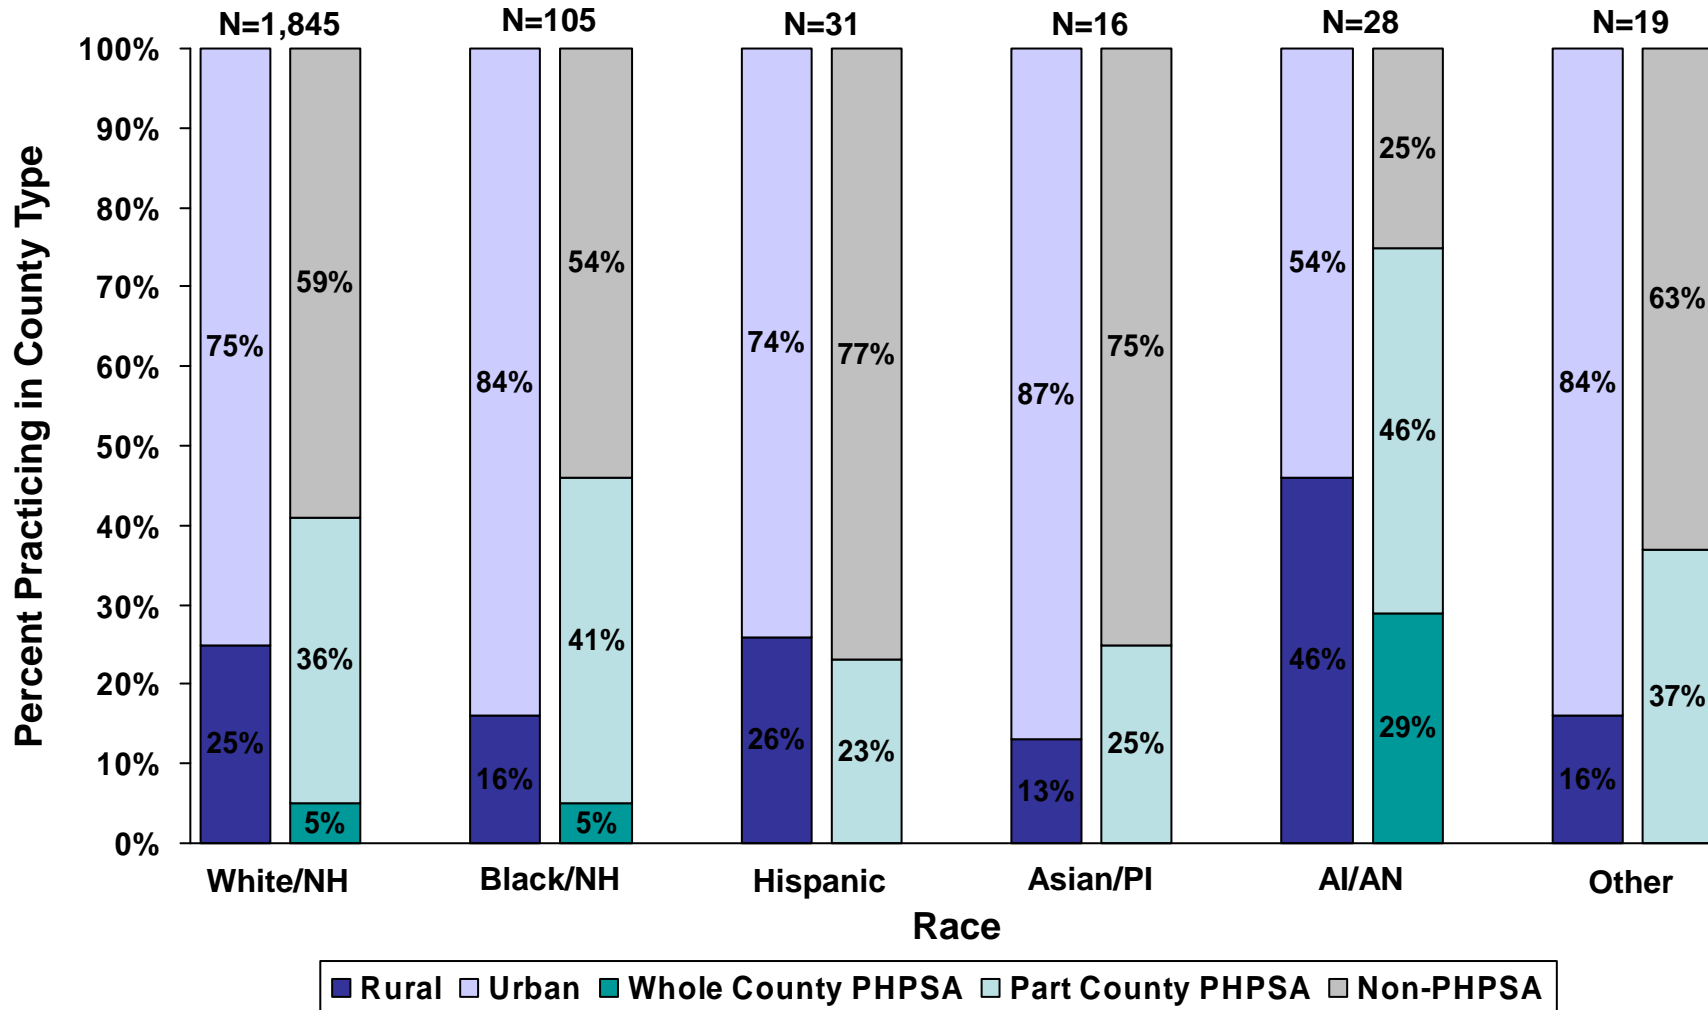

Additional Data Slides

Share of Physician Assistants Practicing in Rural and Persistent Shortage Areas, North Carolina 2004

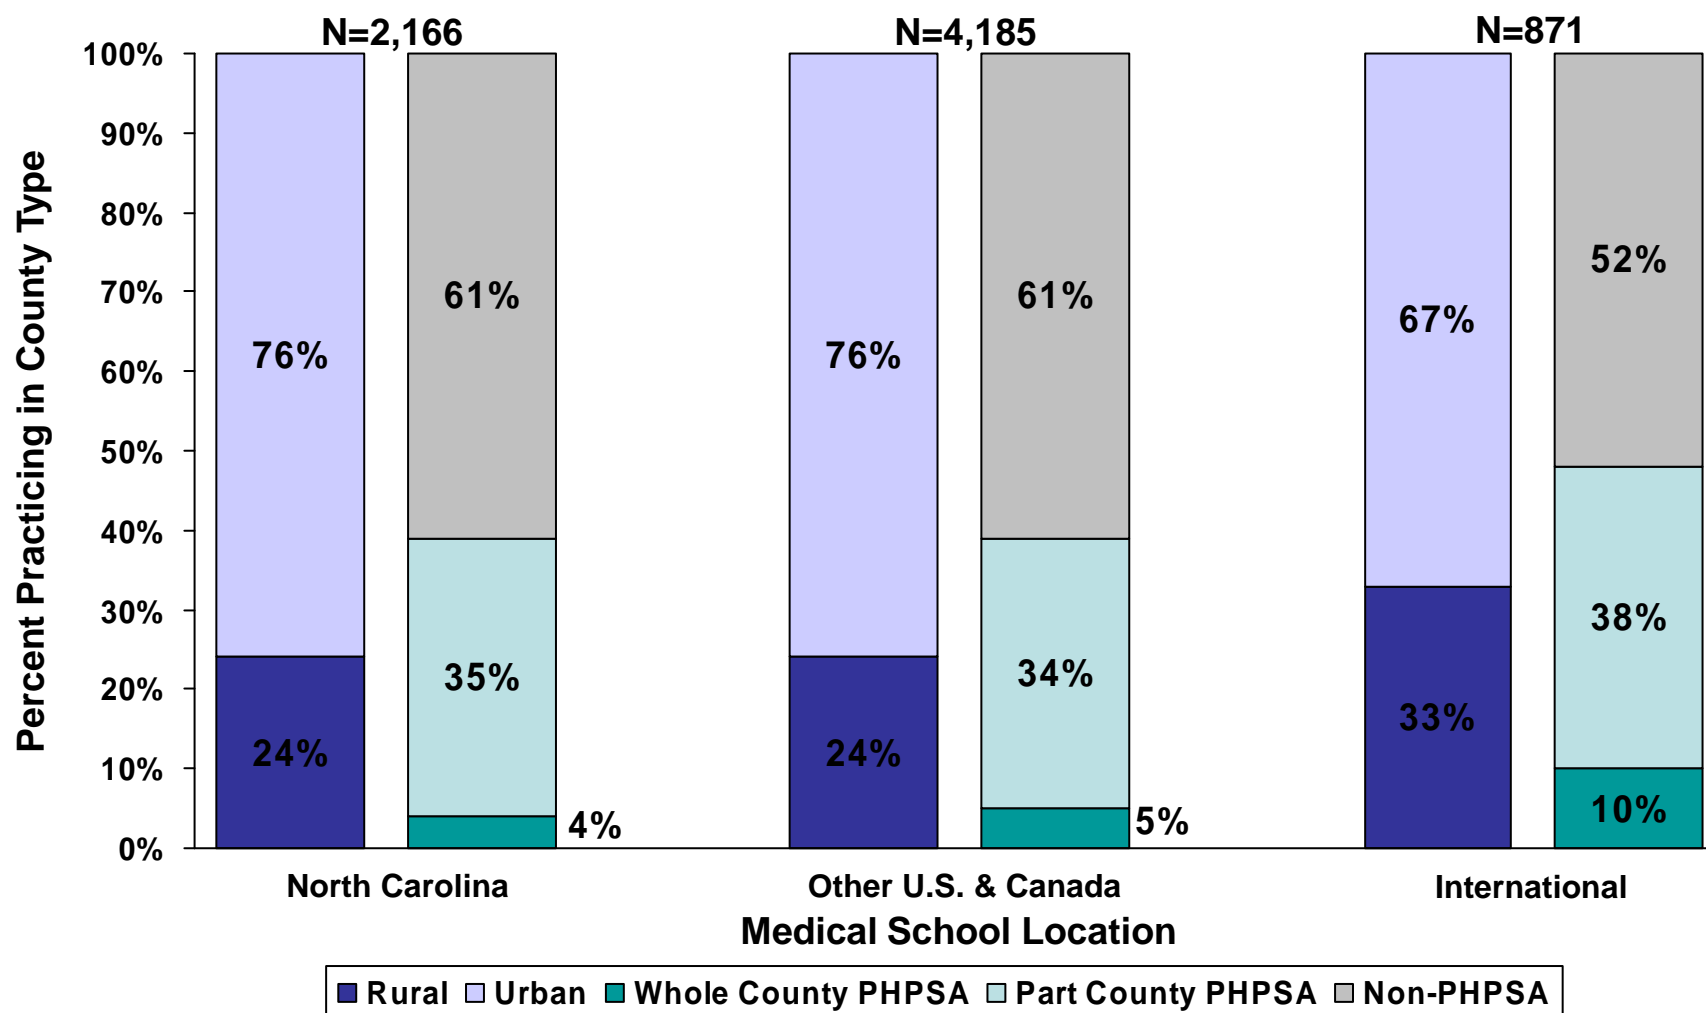

Source: North Carolina Health Professions Data System and US Census. Note: Counts include active, in-state physician assistants. Race data was missing for 215 physician assistants. PI is Pacific Islander. AI/AN is American Indian/Alaskan Native. NH is non-Hispanic. PHPSA is Persistent Health Professional Shortage Area, a county that has been designated a shortage area by the federal government in 6 of the last 7 years.

Share of Nurse Practitioners Practicing in Rural and Persistent Shortage Areas, North Carolina 2004

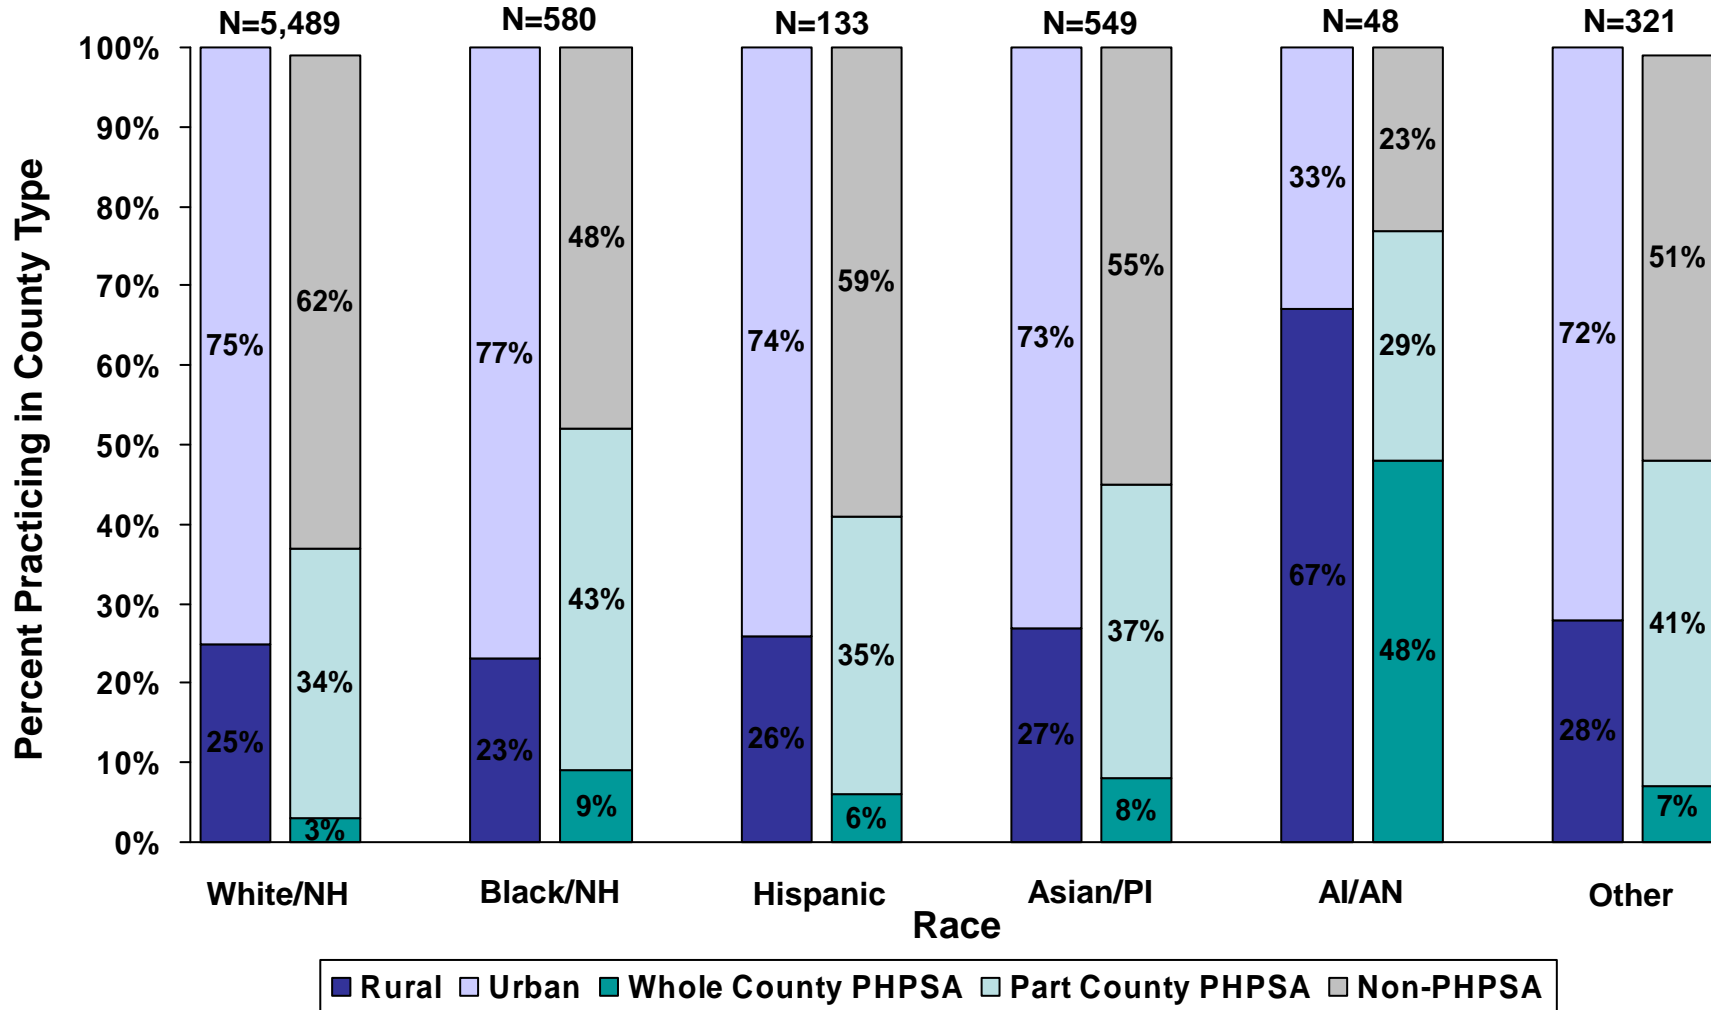

Source: North Carolina Health Professions Data System and US Census. Note: Counts include active, in-state nurse practitioners. Race data was missing for 212 nurse practitioners. PI is Pacific Islander. AI/AN is American Indian/Alaskan Native. NH is non-Hispanic. PHPSA is Persistent Health Professional Shortage Area, a county that has been designated a shortage area by the federal government in 6 of the last 7 years.

Share of Primary Care Physicians Practicing in Rural and Persistent Shortage Areas, North Carolina 2004

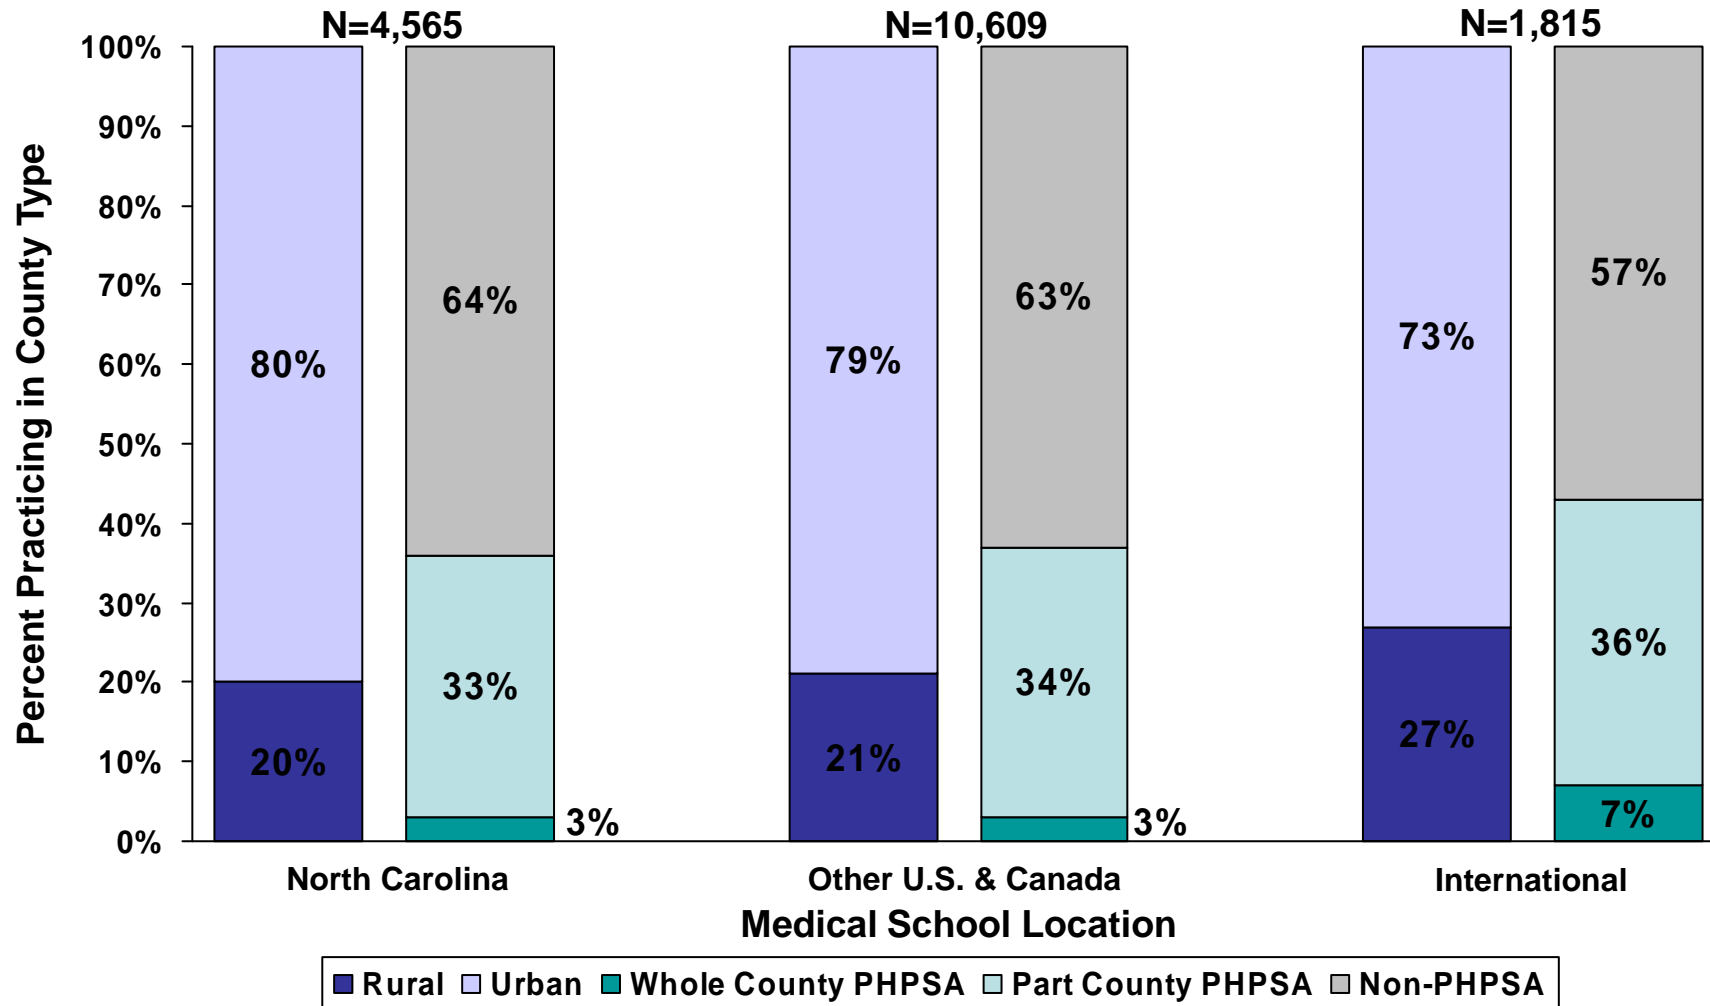

Source: North Carolina Health Professions Data System. Note: Counts include active, in-state, non-federal physicians who designated a primary care specialty. Medical school location data was missing for 43 primary care physicians. PHPSA is Persistent Health Professional Shortage Area, a county that has been designated a shortage area by the federal government in 6 of the last 7 years.
