ⁱ There are 113 closures since 2010 and 155 since 2005. These counts do not include those that have closed and re-opened. ⁱⁱRUCA^s- Rural-Urban Commuting Area Codes, are a new Census tract-based classification scheme that utilizes the standard Bureau of Census Urbanized Area and Urban Cluster definitions in combination with work commuting information to characterize all of the nation's Census tracts regarding their rural and urban status and relationships. In addition, a ZIP Code RUCA approximation was developed. For more information: <http://depts.washington.edu/uwruca/> ⁱⁱⁱ CBSA-"Core Based Statistical Area" is a collective term for both metro and micro areas. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core. For more information: <http://www.census.gov/population/metro/>

^{iv} DSH- Disproportionate Share Hospital; CAH- Critical Access Hospital; MDH- Medicare Dependent Hospital; PPS- Prospective Payment System; SCH- Sole Community Hospital/re-based Sole Community Hospital
