

## State Family Planning Waiver Evaluation Indicators

<b>Evaluation Indicators/Topics</b>
<b>Utilization/Access</b>
1. Assess percentage of eligible women/men (including subgroups) who are enrolled in the waiver
2. Assess percentage of enrolled women/men (including subgroups) who participate in the waiver
3. Assess percentage of participating women/men (including subgroups) who are served by private providers
4. Qualitatively assess enrollee awareness of the program, source of information, and satisfaction with waiver program.
5. Qualitatively assess provider awareness of the program, source of information, and satisfaction with waiver program.
6. Distance traveled, appointment wait time??
<b>Financing</b>
7. Analyze individual components of budget neutrality calculation: <ul style="list-style-type: none"> <li>• (Baseline fertility-observed fertility) x participating women = averted births</li> <li>• Per capita cost of waiver service</li> <li>• Average cost of pre-natal care/delivery for mother</li> <li>• Average cost of birth and first year care for infants</li> </ul>
<b>Clinical Care</b>
8. Assess patient continuation rates for FPW women
9. Assess percentage of FPW women who receive STI (including HIV) screening
10. Assess percentage of FPW women using LARC/highly effective methods of contraception
11. Assess method continuation rates for FPW women
<b>Outcomes – Clinical</b>
12. Compare premature delivery rates for SOBRA Medicaid births between FPW participants and nonparticipants
13. Compare rates of low birth weight deliveries for SOBRA Medicaid births between FPW participants and nonparticipants
<b>Outcomes - Fertility</b>
14. Assess changes in the age at first birth among women participating in the waiver
15. Compare the rates of repeat SOBRA births within the recommended birth to conception interval between FPW participants and nonparticipants

## Financial Evaluation Indicators

State:	Year:
<b>Baseline fertility rate</b>	
<b>Observed fertility rate</b>	
<b>Number of demonstration participants</b>	
<b>Expected births</b> (Baseline fertility rate * demonstration participants)	
<b>Actual births</b> (Observed fertility rate * demonstration participants)	
<b>Averted births</b> (Expected births – Actual births)	
<b>Average Medicaid cost of pre-natal care/delivery for mother</b>	
<b>Average Medicaid cost of birth and first year care for infants</b>	
<b>Savings per averted birth</b> (Average maternal cost + average infant cost)	
<b>Total FP Waiver expenditures for services</b>	
<b>Average FPW service expenditures per participant</b>	
<b>Net annual savings</b> ([Averted births * Savings per averted birth] – Total FP Waiver expenditures for services)
